*International Education at the Crossroads* Deborah N. Cohn, Hilary E. Kahn, 2021-05-11 International Education at the Crossroads captures the essence and complexity of international education in an interconnected and globalized world. Written by leading scholars, international educators, and policy makers, the 26 essays in this volume take stock of the unpredictable landscape of international education and demonstrate why international higher education is more essential now than ever before. Responding to a timely global moment where education and international engagement are being redefined and practiced in new ways, the authors call for a reconsideration of paradigms and critical reflection of the entire field of international education. At the same time, the authors show how international education is an imperative for the future of learning and the world and also crucially that this work cannot be done in a silo. International Education at the Crossroads offers readers a chance to join in the conversation that is as global as it is meaningful in communities, the lives of learners, and institutions around the world. International education requires that everyone the world over work together to produce new knowledge to navigate the crossroads and to collectively chart the directions in which the field will move into the future.

*The Beliefs and Experiences of World Language Teachers in the US* Pamela M. Wesely, 2024-06-11 This book tells the stories of 15 world language (WL) teachers in the United States at elementary and secondary levels through rich descriptions of their lived worlds and experiences. In-depth interviews, extensive observations, learner interviews, and document and environment analysis illustrate in detail how teacher beliefs relate to their practices and are mediated and moderated by their learners, institutional demands, equity, and access to WL education and other factors. The chapters provide a deep and robust explanation of individual teachers' teaching lives and a cross-contextual comparison of their experiences, shining a light on the realities and demands of modern US schools. Grounded in the research literature on language teacher beliefs and cognition, this book takes the stance that all teaching is situated and contextual and that addressing teachers' methods, practices, and knowledges in ways that are divorced from their setting and environment has serious limitations. It offers fascinating insights for researchers, language educators, and pre- and in-service teachers with reflection questions at the end of each chapter to guide readers in drawing connections with their own practice interests and contexts. **Foreign**

**Language Education in America** Steven Berbeco, 2016-04-08 Foreign language teaching in America today falls into three distinct fields of influence and interest: public and private schools, college and other post-secondary programs, and courses for adult learners. At a time when academics and instructors in each of these fields seek to answer similar questions, too few published resources recognize and address the parallels among them. In response, *Foreign Language Education in America* is an edited book with contributions that represent the diversity in foreign language education today, including perspectives from elementary, middle schools, high schools, university-level courses, summer programs, federal government, and international learning. This is a practical guide to the state of the field that fills a much-needed gap for scholars, researchers,

administrators and practitioners who are looking for a resource that describes effective practices across the field
