Ten years on Nuclear Education and Training: From Concern to Capability considers what has changed in that time and finds that while some countries have taken positive actions in a number of others, human resources could soon be facing serious challenges in coping with existing and potential new nuclear facilities. This is exacerbated by the increasing rate of retirement as the workforce ages. This report provides a qualitative characterisation of human resource needs and appraises instruments and programmes in nuclear education and training initiated by various stakeholders in different countries. In this context it also examines the current and

future uses of nuclear research facilities for education and training purposes Regarding the nuclear training component of workforce competence it outlines a job taxonomy which could be a basis for addressing the needs of workers across this sector It presents the taxonomy as a way of enhancing mutual recognition and increasing consistency of education and training for both developed and developing countries [AMSTAT News](#) ,2005
