*Participatory Culture and the Social Value of an Architectural Icon: Sydney Opera House* Cristina Garduno Freeman, 2017-09-22 This book develops new and innovative methods for understanding the cultural significance of places such as the World Heritage listed Sydney Opera House By connecting participatory media visual culture and social value Cristina Garduno Freeman contributes to a fast growing body of scholarship on digital heritage and the popular reception of architecture In this her first book she opens up a fresh perspective on heritage as well as the ways in which people relate to architecture via participation on social media Social media sites such as YouTube Pinterest Wikipedia Facebook and Flickr as well as others become places for people to express their connections with places for example the Sydney Opera House Garduno Freeman analyses real world

examples from souvenirs to opera house shaped cakes and untangles the tangible and intangible ways in which the significance of heritage is created disseminated and maintained As people s encounters with World Heritage become increasingly mediated by the digital sphere there is a growing imperative for academics professionals and policy makers to understand the social value of significant places This book is beneficial to academics students and professionals of architecture     *The British National Bibliography* Arthur James Wells,2009     Musical Genre Mads Krogh,2025-01-09 From recent decades digitization have emerged a myriad of techniques for mapping musical life identifying patterns in sound or musico cultural practices and compiling labels names tags and classes on an unprecedented scale Proliferating genre catalogs in the context of digital platforms and the conjunction of genre with notions of for example mood and activity are among the consequences which challenge prevailing scene based and identificational understandings in musical genre studies This book answers to this challenge Centering on the concepts of musico generic assemblage and abstraction it offers new perspectives on musical genre fit for current times but with the potential for also reconsidering historical cases     **The Information Society** Robin Mansell,2009 The information society refers to a constellation of developments arising from the growing use of communication technologies in the acquisition storage and processing of information and the role of information in supporting the creation and exchange of knowledge Research on information societies really began to take off in the 1970s when Daniel Bell wrote about the information age While there were earlier works that focused on the growing importance of information in the economy it was not until the mid 1990s and the spread of the Internet that this field of study experienced a huge expansion across a broad range of disciplines in the social sciences and beyond A critical mass of scholarship has now accumulated establishing the information society and information societies as a terrain of substance and complexity the exploration and understanding of which requires increasingly sophisticated navigation skills As research in and around the area continues to flourish as never before this new title in Routledge s Major Works series Critical Concepts in Sociology meets the need for an authoritative reference work to make sense of a rapidly growing and ever more complex corpus of literature and to provide a map of the area as it has emerged and developed over the last thirty years or so The Information Society is fully indexed and has a comprehensive introduction newly written by the editor which places the material in its historical and intellectual context It is an essential work of reference and is destined to be valued by scholars and students as well as policy makers and practitioners in the field as a vital one stop research resource Publisher s website

**Thinking Television** Anandam P. Kavoori,2008 Thinking Television tells the story of an innovative media literacy project focused on the creation of media programming that makes money and makes a difference Woven around critiques of student produced concepts for television that thinks this book offers new directions for critical media literacy popular culture studies and the interdisciplinary concerns of cultural studies     *Conference Record* ,2005     **Media Literacy is Elementary** Jeff Share,2009 Researchers in a range of fields have acknowledged that childhood is a construct emerging from modernist

perspectives that have not always benefited those who are younger The purposes of the Rethinking Childhood series are to provide critical locations for scholarship that challenges the universalization of childhood and introduces new reconceptualized and critical spaces from which opportunities and possibilities are generated for those who are younger Diverse histories and cultures are considered of major importance as well as issues of critical social justice *Globalization, Art, & Education* Elizabeth Manley Delacruz, 2009 What can art educators contribute to the world in an age of globalization Timely research critical analyses narrative essays and case studies from 49 scholars from all over the world examine how globalization interfaces not only with art and education but also with local and regional cultural practices and identities economies political strategies and ecological environmental concerns of people around the world Annual Review of Information Science & Technology Blaise Cronin, 2006-10 ARIST published annually since 1966 is a landmark publication within the information science community It surveys the landscape of information science and technology providing an analytical authoritative and accessible overview of recent trends and significant developments The range of topics varies considerably reflecting the dynamism of the discipline and the diversity of theoretical and applied perspectives While ARIST continues to cover key topics associated with classical information science e.g. bibliometrics information retrieval editor Blaise Cronin is selectively expanding its footprint in an effort to connect information science more tightly with cognate academic and professional communities Medienkultur im Wandel Andreas Hepp, Deutsche Gesellschaft für Publizistik- und Kommunikationswissenschaft. Arbeitstagung, 2010 *Building Tomorrow* André Manseau, Rob Shields, 2005 In the past decade construction and engineering have changed dramatically with an explosion of innovative new approaches to construction and new methodologies By bringing together economic social and construction engineering management perspectives this book offers a unique and comprehensive survey of these approaches and techniques It presents a history of studies in innovation in construction and engineering and then presents the most recent models of innovation brokering and risk management based on complex project based industries Innovation is defined and competing theories are discussed in the light of operational issues The book covers all aspects including the importance of construction and engineering cultures in the trades for successful project innovation It also discusses the role of government and policy makers the implications of rapid change for the building trades and skilled labour and the difficulty of measuring innovation quantitatively **Place Studies in Art, Media, Science and Technology** Andreas Broeckmann, Gunalan Nadarajan, 2008 This volume presents sixteen studies about the complex interactions between art media science and technology Back cover *Wired Shut* Tarleton Gillespie, 2007 While the public and the media have been distracted by the story of Napster warnings about the evils of piracy and lawsuits by the recording and film industries the enforcement of copyright law in the digital world has quietly shifted from regulating copying to regulating the design of technology Lawmakers and commercial interests are pursuing what might be called a technical fix instead of specifying what can and cannot be done legally with a copyrighted work this

new approach calls for the strategic use of encryption technologies to build standards of copyright directly into digital devices so that some uses are possible and others rendered impossible In *Wired Shut* Tarleton Gillespie examines this shift to technical copy protection and its profound political economic and cultural implications Gillespie reveals that the real story is not the technological controls themselves but the political economic and cultural arrangements being put in place to make them work He shows that this approach to digital copyright depends on new kinds of alliances among content and technology industries legislators regulators and the courts and is changing the relationship between law and technology in the process The film and music industries he claims are deploying copyright in order to funnel digital culture into increasingly commercial patterns that threaten to undermine the democratic potential of a network society In this broad context Gillespie examines three recent controversies over digital copyright the failed effort to develop copy protection for portable music players with the Strategic Digital Music Initiative SDMI the encryption system used in DVDs and the film industry's legal response to the tools that challenged them and the attempt by the FCC to mandate the broadcast flag copy protection system for digital television In each he argues that whether or not such technical constraints ever succeed the political alignments required will profoundly shape the future of cultural expression in a digital age
