Climate Change and the Future of Democracy R. S. Deese, 2018-09-10 This book will survey past and present efforts to democratize international institutions and will advance the argument that a new degree of transparency and accountability on a global scale is necessary to address the threat of climate change The volume will analyse how global governance could become more democratic and consequently more responsive to the challenge of climate change As economic globalization has accelerated since 1945 international institutions have done a remarkable job in facilitating global communication and commerce but have been far less effective in protecting the global commons

outposts in the present and future urban fossils The book explores the dynamic changing and contradictory relationship between architecture and the global environmental crisis and looks at how to re position architectural and urban practice in relation to wider intellectual environmental political and cultural shifts The book argues that these rounder and richer accounts can better equip humanity to think through questions of vulnerability responsibility and opportunity that are presented by immense processes of planetary change These are cautionary tales for the Anthropocene Central to this project is the proposition that living with uncertainty requires that architecture is reframed as a provisional practice This book would be beneficial to students and academics working in architecture geography planning and environmental humanities as well as professionals working to shape the future of cities **Community Policing** Victor E.
