Violence and Communication Jose Antonio Mingolarra, Carmen Arocena, Rosa Martin Sabaris, 2012 Combining the terms violence and communication is a difficult complex incomplete and perhaps impossible task yet Violence and Communication seeks to demonstrate both generic and particular aspects of the expression and representation of violence In a general sense this expression and representation of violence In a general sense the expression and its consequences are explored in diverse global historical examples of violent events including the Holocaust the genocide in Rwanda and 9 11 as well as in thematic issues such as women and sexuality poverty and inequality and the Internet and violence In a more particular sense the work also addresses terrorist violence in the Basque Country exploring specific topics such as its psychological effects in society and discursive consequences in the print media and on television The book examines the representation of these different forms of violence in both the visual media film television and photography and the printed word newspapers literature and so on In short the work attempts to visualize what have been often non visible forms of violence as well as critically analyze the multiple ways in which violence is represented and communicated

Ciottone's Disaster Medicine - E-Book Gregory R. Ciottone, 2023-03-07 While medical specialists in disaster mitigation preparedness and response are needed worldwide the initial phase of disaster response is almost entirely dependent upon local resources making it essential that all healthcare personnel have a working knowledge of the field and

stand ready to integrate into the response system Ciottone's Disaster Medicine 3rd Edition is the most comprehensive reference available to help accomplish these goals in every community. It thoroughly covers isolated domestic events as well as global disasters and humanitarian crises. Dr Gregory Ciottone and more than 200 worldwide authorities share their knowledge and expertise on the preparation, assessment, and management of both natural and man-made disasters, including lessons learned by the responders to contemporary disasters such as the COVID-19 pandemic, Australian and western U.S. wildfires, European heatwaves, the Beirut explosion, recent hurricanes and typhoons, and the global refugee crisis. Part 1 offers an A to Z resource for every aspect of disaster medicine and management, while Part 2 features an exhaustive compilation of every conceivable disaster event organized to facilitate quick reference in a real-time setting. Covers basic concepts such as identification of risks, organizational preparedness, equipment, planning, disaster education and training, and more advanced concepts such as disaster risk reduction, health in complex emergencies, building local disaster resiliency, psychological impact of disasters on children, and more. Contains new decision trees throughout that help guide you through the decision-making process in difficult situations. Uses an easy-to-follow templated approach to historical perspectives, overviews of current practice, including pre-incident and post-incident actions, medical treatment of casualties, and potential pitfalls. Includes updated sections on man-made disasters, including mass casualties, active shooter situations, integrated response to terrorist attacks, and chemical, biological, radiological, nuclear, high-yield explosives disasters. Discusses the latest technologies, such as the use of mobile disaster applications, drone response systems, and virtual reality simulation training. Features thoroughly updated information on crisis leadership, practical applications of disaster epidemiology, disaster and climate change, and the integration of non-government agencies, NGOs in disaster response, a critical topic for those responding to humanitarian needs overseas. Includes new chapters on Pandemic Preparedness and Response, Disaster Medicine in a Changing Climate, Disaster Response in Asia, Building Local Capacity and Disaster Resiliency, Civilian Military Coordination in Disaster Response, Medical Simulation in Disaster Preparedness, Disaster Nursing, Crisis Management, Leadership, Palliative Care in Disasters, Counter Terrorism Medicine, SARS-CoV-2, COVID-19, and SARS, and Disasters in Space Travel. An eBook version is included with purchase. The eBook allows you to access all of the text, figures, and references, with the ability to search, customize your content, make notes and highlights, and have content read aloud.

Minimum standards and recommendations for medical teams responding to highly infectious disease outbreaks World Health Organization, 2024-06-26 Infectious diseases with epidemic potential remain a significant and constant threat to the health and security of populations around the world, requiring robust health emergency preparedness, readiness and response systems and capacities at local and national levels. Emergency Medical Teams (EMTs), the EMT Initiative and its global network focus on establishing common quality standards and recommendations for medical teams to respond to health emergencies rapidly and effectively, as well as strengthening and supporting national capacities through strong collaboration and coordination. This publication defines minimum standards for the establishment of such critical capacities in a predictable and quality assured manner and will enhance the interoperability between national, regional and international capacities. This will contribute to the development and classification of respective specialized care teams (SCT) within the EMT framework and will provide guidance to member states, ministries of health, national and international EMTs and other key stakeholders to develop capacities and trainings preparing for or responding to outbreaks of highly infectious
