Proceedings of International Conference on Communication and Artificial Intelligence Vishal Goyal, Manish Gupta, Seyedali Mirjalili, Aditya Trivedi, 2022-05-09 This book is a collection of best selected research papers presented at the International Conference on Communication and Artificial Intelligence ICCAI 2021 held in the Department of Electronics Communication Engineering GLA University Mathura India during 19-20 November 2021. The primary focus of the book is on the research information related to artificial intelligence networks and smart systems applied in the areas of industries, government sectors and educational institutions worldwide. Diverse themes with a central idea of sustainable networking solutions are discussed in the book. The book presents innovative work by leading academics, researchers and experts from industry.

Proceedings of Eighth International Congress on Information and Communication Technology Xin-She Yang, R. Simon Sherratt, Nilanjan Dey, Amit Joshi, 2023-08-31 This book gathers selected high quality research papers presented at the Eighth International Congress on Information and Communication Technology held at Brunel University London on 20-23 February 2023. It discusses emerging topics pertaining to information and communication technology (ICT) for managerial applications, e-governance, e-agriculture, e-education and computing technologies, the Internet of Things (IoT) and e-mining. Written by respected experts and researchers working on ICT, the book offers a valuable asset for young researchers involved in advanced studies. The work is presented in four volumes.

Industrial Internet of Things Security Sunil Kumar Chawla, Neha Sharma, Ahmed A. Elngar, Prasenjit Chatterjee, P. Naga Srinivasu, 2024-10-28 The industrial landscape is changing rapidly and so is global society. This change is driven by the growing adoption of the Industrial Internet of Things (IIoT) and artificial intelligence (AI) technologies. IIoT and AI are transforming the way industrial engineering is done, enabling new levels of automation, productivity and efficiency. However, as IIoT and AI become more pervasive in the industrial world, they also offer new security risks that must be addressed to ensure the reliability and safety of critical systems. **Industrial Internet of Things Security: Protecting AI Enabled Engineering Systems in Cloud and Edge Environments** provides a comprehensive guide to IIoT security, covering topics such as network architecture, risk management, data security and compliance. It addresses the unique security challenges that the cloud and edge environments pose, providing practical guidance for securing IIoT networks in these contexts. It includes numerous real world case studies and examples, providing readers with practical insights into how IIoT security and AI enabled industrial engineering are being implemented in various industries. Best practices are emphasized for the readers to ensure the reliability, safety and security of their systems while also learning the latest developments in IIoT security for AI enabled industrial engineering systems in this rapidly evolving field. By offering step by step guidance for the implantation process along with best practices, this book becomes a valuable resource for practitioners and engineers in the areas of industrial engineering, IT, computer engineering and anyone looking to secure their IIoT network against cyber threats.

Intelligent Systems and Industrial

Internet of Things for Sustainable Development C. Kishor Kumar Reddy, P. R Anisha, Marlia Mohd Hanafiah, Srinath Doss, Kari Lippert, 2024-05-10 The book studies emerging and sustaining technologies for applications of Industry 5.0 to develop technological solutions to address numerous real life challenges to solve sustainable development related issues. It identifies limitations, pitfalls, and open research questions in industry 5.0, discusses real time problems and challenges with equivalent solutions with a focus on sustainable growth to develop humanization and environmentally friendly intelligent system applications. It analyses applications enabled by Industry 5.0 such as healthcare, supply chain, smart farming, remote sensing, production in manufacturing and cloud manufacturing. It also includes the difficulties and problems posed by the organization between robots and humans on the assembly line to maintain sustainability. Addresses key challenges in implementing intelligent systems in IoT based applications including issues ranging from cost and energy efficiency to availability and quality of service. Explores the technologies to allow human machine association and its impact on consumption and sustainability. Provides sustainable solutions to emerging industrial problems especially in healthcare, manufacturing, remote sensing, environmental engineering. Examines need for data pre processing, classification, prediction, Cluster Analysis, Mining, Multimedia, Text and Web Data. Advanced machine learning techniques for scientific programming in Industry. Presents success stories in the form of case studies of IIoT, IIoRT, Big Data, Intelligent Systems, Deep Learning in Industry 5.0 era. The text is for postgraduate students, professionals, and academic researchers working in the fields of computer science and information technology especially for professionals and researchers interested in the technological side of sustainable development. *Toward Social Internet of Things (SIoT): Enabling Technologies, Architectures and Applications* Aboul Ella Hassanien, Roheet Bhatnagar, Nour Eldeen M. Khalifa, Mohamed Hamed N. Taha, 2019-07-23 This unique book discusses a selection of highly relevant topics in the Social Internet of Things SIoT including blockchain, fog computing, and data fusion. It also presents numerous SIoT related applications in fields such as agriculture, health care, education, and security, allowing researchers and industry practitioners to gain a better understanding of the Social Internet of Things. [Push Button Agriculture](#) K. R. Krishna, 2017-03-16 This book covers three main types of agricultural systems: the use of robotics, drones, unmanned aerial vehicles, and satellite guided precision farming methods. Some of these are well refined and are currently in use, while others are in need of refinement and are yet to become popular. The book provides a valuable source of information on this developing field for those involved with agriculture and farming and agricultural engineering. The book is also applicable as a textbook for students and a reference for faculty. **Advanced IoT Technologies and Applications in the Industry 4.0 Digital Economy** Alex Khang, Vugar Abdullayev, Vladimir Hahanov, Vrushank Shah, 2024-02-27 The application of internet of things IoT technologies and artificial intelligence AI enabled IoT solutions has gradually become accepted by business and production organizations as an effective tool for automating several activities effectively and efficiently and developing and distributing products to the global market. Within

this book the reader will learn how to implement IoT devices IoT equipped machines and AI equipped IoT applications using models and methodologies along with an array of case studies Advanced IoT Technologies and Applications in the Industry 4.0 Digital Economy covers the basics of IoT equipped machines in developing and managing various activities in many industries It discusses all of the key points of an AI enabled IoT solution which includes predictive analytics robotic process automation predictive maintenance automated processes IoT technologies and IoT equipped sensors related to machines and processes production testing systems and product assessment processes in the production environment The book presents the concepts and interactive methods using datasets processing workflow charts and architectural diagrams along with additional real time systems for easy and fast understanding of the application of IoT equipped machines and AI enabled solutions in organizations and includes many case studies throughout the book to enforce reader comprehension This book is an ideal read for industry specialists practitioners researchers scientists and engineers working or involved in the fields of Robotics IT Computer Science Soft Computing IoT AI ML DL Data Science the Semantic Web Knowledge Engineering and other related fields
