This book presents advances in the research of educational robotics and showcases how they can be used to facilitate learning. It summarizes popular and relevant terms and theories in educational robotics via analyzing one hundred influential journal articles in this field to provide readers background knowledge on the subject matter. This book also guides readers in understanding how different types of robotics are utilized to promote learning among different types of students in different contexts and in different disciplines of study.

**Applying Artificial Intelligence in Translation** Katharina Walter, Marco Agnetta, 2025-11-07

This collection critically examines the opportunities and challenges associated with the use of AI-based tools in translation, which have rapidly transformed the language industry in recent years. This volume is divided into three sections that explore the use of AI-based tools in specific domains or on specific phenomena. While the first section addresses the impact of AI-enhanced translation on both workflows and outputs from the lens of creativity and idiomativity, the second section examines key questions concerning the use of AI-based translation tools in various domains from technology to tourism. Contributions in the third section analyze AI-induced changes in the areas of media accessibility and journalism as well as taking a critical look at evolving job perspectives and job profiles within the language industry. Taken together, the chapters in this volume envisage sustainable forms of interaction between humans and machines that put humans at the center of AI-induced technological changes. This book will be of interest to students and scholars in translation studies, particularly those working in translation technology, audiovisual translation, and literary translation, as well as practicing translators.
