Actuaries' Survival Guide Ping Wang, Fred Szabo, 2024-02-02 Actuaries Survival Guide Navigating the Exam and Data Science Third Edition explains what actuaries are what they do and where they do it It describes exciting combinations of ideas techniques and skills involved in the day to day work of actuaries This edition has been updated to reflect the rise of social networking and the internet the progress toward a global knowledge based economy and the global expansion of the actuarial field that has occurred since the prior edition Includes details on the Society of Actuaries SOA and Casualty Actuarial Society CAS examinations as well as sample questions and answers Presents an overview of career options and includes profiles of companies and agencies that employ actuaries Provides a link between theory and practice and helps readers understand the blend of qualitative and quantitative skills and knowledge required to succeed in actuarial exams Offers insights provided by real life actuaries and actuarial students about the profession **ACTEX Study Manual for SOA Exam IFM** Johnny Li, 2020 Author Johnny Li utilizes a completely different pedagogical approach By reading this manual you should be able to understand the concepts and techniques you need for the exam Where possible concepts and techniques are demonstrated with examples and integrated into practice problems included in the manual To help you better prepare for the exam the author intentionally writes the practice problems and the mock exams in a similar format to the released exam and sample questions Becoming acquainted with the style and format will help you recollect information you've learned more easily and prevent you from needing extra time to solve problems on the actual exam The author has gone to the painstaking effort of putting together a manual that is targeted and focused on teaching the content specifically tested on the IFM exam unlike the Derivatives Markets text Li approaches the concepts in a more streamlined fashion and incorporates sample questions that have proven to accurately represent how students experience the SOA exams The manual is broken into two broad themes Quantitative and Qualitative The first part of this manual focuses on the Quantitative theme which encompasses all of the topics covered in Derivatives Markets the required text authored by R L McDonald and the technical topics from Corporate Finance the required text authored by J Berk and others To help you develop a strong foundation we begin with the easiest calculations that are just straightforward extensions of what you have learnt in Exam FM These are then followed by progressively harder calculations ranging from the binomial model to various versions of the Black Scholes

formula The second part of the manual is devoted to the Qualitative theme which encompasses a lot of definitions and hard facts that you have to memorize unfortunately There are some calculations in the Qualitative theme but they are typically trivial To help you breeze through this theme the materials in this theme are presented in an easy to read point form with the most important points being clearly highlighted Of course we have practice problems to test how well you can remember the materials The manual concludes with several mock exams with original questions
