Microeconomic Laws A Philosophical Analysis:

Microeconomic Laws Alexander Rosenberg, 2010-11-23 Rosenberg applies current thinking in philosophy of science to neoclassical economics in order to assess its claims to scientific standing. Although philosophers have used history and psychology as paradigms for the examination of social science, there is good reason to believe that economics is a more appropriate subject for analysis. It is the most systematized and quantified of the social sciences; its practitioners have reached a measure of consensus on important aspects of their subject and it encompasses a large number of apparently law-like propositions.

The Oxford Handbook of Philosophy of Economics Harold Kincaid, Don Ross, 2009-03-26 This volume is the first comprehensive cohesive and accessible reference source to the philosophy of economics, presenting important new scholarship by top scholars.

Overview and Economic Analysis of Property and Criminal Law Jenny Bourne Wahl, 1998 First published in 1999. Routledge is an imprint of Taylor & Francis, an informal company.

Philosophy in Economics Joseph C. Pitt, 2012-12-06 The essays in this volume are the result of a workshop held at Virginia Polytechnic Institute and State University in April 1979. The assembled group was diverse, comprised of philosophers, economists, and statisticians. But it was not the complete group on which we had initially planned. Richard Rudner was in France on sabbatical and was unable to fly back for the occasion. His untimely death the following summer saddened us all, for we lost not just a colleague but a friend. This book is dedicated to him out of the spirit of friendship and in appreciation for the groundbreaking work he did in the philosophy of the social sciences. In addition to the participants, a number of people worked very hard to make our gathering possible. We are especially indebted to Dean Henry Bauer, Dean Ernie Stout, and Dean John Ballweg of the College of Arts and Sciences at Virginia Tech for their good will and support, both moral and substantive. We would also like to thank Professor Guy Hammond, Head Department of Philosophy and Religion, for his council and assistance. Our special thanks to Jeanne Keister and Betty Davis for their patience with unending typing and reservations, and finally to Barbara Kersey, always at hand, ever helpful. Without them, nothing would have transpired.

Readings in the Philosophy of Social Science Michael Martin, Lee C. McIntyre, 1994 the first comprehensive anthology in the philosophy of social science to appear since the late 1960s.

The Philosophy of Science Anouk Barberousse, Denis Bonnay, Mikael Cozic, 2018-06-28 Philosophy of science studies the methods, theories, and concepts used by scientists. It mainly developed as a field in its own right during the twentieth century and is now a diversified and lively research area. This book surveys the current state of the discipline by focusing on central themes like confirmation of scientific hypotheses, scientific explanation, causality, the relationship between science and metaphysics, scientific change, the relationship between philosophy of science and science studies, the role of theories and models, unity of science. These themes define general philosophy of science. The book also presents sub-disciplines in the philosophy of science dealing with the

main sciences logic mathematics physics biology medicine cognitive science linguistics social sciences and economics While it is common to address the specific philosophical problems raised by physics and biology in such a book the place assigned to the philosophy of special sciences is much more unusual Most authors collaborate on a regular basis in their research or teaching and share a common vision of philosophy of science and its place within philosophy and academia in general The chapters have been written in close accordance with the three editors thus achieving strong unity of style and tone *The University of Western Ontario Series in Philosophy of Science* ,1991 *Philosophy of Economics* Charles Dyke,1981
