Migrant Protest Elias Steinhilper, 2025-10-01 Migrant protest has proliferated worldwide in the last two decades explicitly posing questions of identity rights and equality in a globalized world Nonetheless such mobilizations are often considered anomalies in social movement studies and political sociology more broadly due to weak interests and a particularly disadvantageous position of outsiders to claim rights connected to citizenship In an attempt to address this seeming paradox Migrant Protest Interactive Dynamics in Precarious Mobilizations explores the interactions and spaces shaping the emergence trajectory and fragmentation of migrant protest in unfavorable contexts of marginalization Such a perspective unveils both the odds of precarious mobilizations and the ways they can be temporarily overcome While adopting the encompassing terminology of migrant this book focuses on precarious migrants including both asylum seekers and illegalized migrants After Charlie Hebdo Gavan Titley, Des Freedman, Gholam Khiabany, Aurélien Mondon, 2017-11-15 An incisive and timely analysis of the impact the Paris terror attacks have had on today's struggles over multiculturalism integration and freedom of speech Collective Capacity Building Simona Sava, Claudia Borca, Gheorghe Clitan, 2020-02-03 The theme of Collective Capacity Building CCB is a comprehensive one resonating with the complexity of the knowledge society Such complexity requires contributions of a wide range of scientists for a multidimensional understanding Thus philosophers economists educationalists sociologists political scientists psychologists scientists from Romania Germany Spain Serbia Greece Cyprus Latvia and Sweden have come together in Collective Capacity Building Shaping Education and Communication in Knowledge Society Their choice to discuss current societal challenges in different fields in a transdisciplinary and interdisciplinary manner illustrates how communication education interaction identity science professionalization and others are re-shaped nowadays As it is increasingly evident that the challenges of a knowledge based society are more resilient to traditional approaches and the new focus is on how to regulate new skills and capacities the contributions propose a more stimulating reflection and dialogue on how CCB can foster progress in some of the most intricate educational social cultural geopolitical and economic issues today In light of this the contributors have addressed the following questions How can we define collaboration in communication and educational theory and practice What are the tools and the rules adopted by CCB in various practical contexts How can researchers develop their theoretical perspective on CCB after their thorough investigation of current and complex educational issues and societal challenges **Exploring the Ecologies of Music and Sound** Makis Solomos, 2023-04-07 Makis Solomos explores the ecologies of music and sound inspired by Felix Guattari for whom environmental destruction caused by capitalism goes hand in hand with deteriorating ways of living and feeling and for whom an ecosophical stance combining various ecological registers offers a glimpse of emancipation a position strengthened today by intersectional approaches Solomos explores environmental mental and social ecologies through the lens of the history of music and current artivisms especially in the fields of acoustic ecology

L'inexistence de l'État en Afrique contemporaine et l'opérationnalisation des alternatives politiques émancipatrices, 2025-09-04 Ce numéro procède d'une construction radicale et pluridisciplinaire des théories de l'état en Afrique postcoloniale en corroborant dans les faits et l'analyse politique l'impact total de la greffe de l'État sur la politique de l'état occidental dans les sociétés africaines contemporaines Le sommet de cette entreprise de construction philosophique politique métaphysique et politique réside dans le rejet catégorique de l'hégémonie idéologique que Jean François Bayart et ses disciples de l'école africaniste de Paris continuent d'exercer dans les universités en Afrique et partout ailleurs en Occident Toute théorie sur l'état en Afrique doit nécessairement tenir compte de l'imbrication dialectique entre le visible et l'invisible le politique et le religieux les vivants et les morts Dieu et les ancêtres dans la conception la définition et la résolution des problèmes inhérents au vivre ensemble dans les sociétés africaines qui se définissent d'abord et surtout selon des schèmes métaphysiques idéologiques et holistiques des religions traditionnelles africaines C'est ce qui explique que l'impicentre et le logiciel pour comprendre les crises sociales et politiques récurrentes de la postcolonie s'expriment dans le langage magico religieux des sorcelleries des possessions par les esprits des envoiements et des empoisonnements
