Patients discussed in these cases will have drug therapy problems requiring identification and management. For each case you will be asked to develop a Patient Database Drug Therapy Problem Worksheet and Pharmacotherapy Care Plan using the forms provided. These forms are adapted from those originally developed by the American Society of Health System Pharmacists Clinical Skills program. Each case includes Learning Objectives, Patient Presentation, Targeted Questions followed by a hint that refers you to pages in Pharmacotherapy Principles and Practice 2e where you can find the information to answer the question. Follow up Global Perspective which highlights an issue related to the case that is important to countries outside of North America or involve different ethnic groups or races.
