Bio-Inspired Computing for Image and Video Processing D. P. Acharya, V. Santhi, 2018-01-02 In recent years bio inspired computational theories and tools have developed to assist people in extracting knowledge from high dimensional data. These differ in how they take a more evolutionary approach to learning as opposed to traditional artificial intelligence AI and what could be described as creationist methods. Instead bio inspired computing takes a bottom up decentralized approach that often involves the method of specifying a set of simple rules a set of simple organisms which adhere to those rules and of iteratively applying those rules. Bio Inspired Computing for Image and Video Processing covers interesting and challenging new theories in image and video processing. It addresses the growing demand for image and video processing in diverse application areas such as secured biomedical imaging biometrics remote sensing texture understanding pattern recognition content based image retrieval and more. This book is perfect for students following this topic at both undergraduate and postgraduate level. It will also prove indispensable to researchers who have an interest in image processing using bio inspired computing.
