## **Online Consumer Trading Standards Law Practice:**

*Consumer Law and Policy on Faulty Goods* Nuhu Yidana, 2025-12-01 This book evaluates the adequacy of the existing law to protect consumers in Ghana when they are supplied with faulty goods. In turn the law in Ghana is compared with the law in England and Wales. Specifically the analysis offers a comparative assessment of the requirements for the quality of goods with respect to the obligations of traders of goods, remedies for consumers and mechanisms of redress in Ghana and the UK as influenced by EU law. In recent years rapid technological advancements have affected virtually every aspect of human life. One aspect of this development is the production of a wide variety of goods with diverse descriptions. While the benefits of meeting the ever increasing consumer needs are significant the main challenge for consumers at the point of purchase is assessing the quality of the goods. This fundamental concern raises important questions about whether the current laws adequately protect their right to receive goods of appropriate quality in their contractual agreements. The book first dissects the prevailing requirements of the law in Ghana before examining the identified shortcomings in comparison with the UK law whilst bearing in mind the unique circumstances in Ghana. Based on this comparative analysis the book offers potential solutions and recommendations to address the law's current weaknesses regarding traders obligations, remedies for consumers and means of redress in Ghana. Consequently the book outlines reforms that countries like Ghana should implement to better protect consumers.

this book remains in great demand **Consumer and Trading Standards** Bryan Lewin (Writer on British trading standards), Jonathan Kirk, 2015 This book is an authoritative and comprehensive guide for everyone involved in UK consumer and trading standards law. The user friendly text provides a clear and exhaustive analysis of the law including UK case law and its application working of the statutory provision plus authoritative commentary and analysis of the practical issues. This fourth edition covers all recent legal developments along with informed commentary on new UK legislation. The topics covered include principles of regulatory law, civil proceedings, unfair commercial practices, unfair trading, fraud and money laundering, intellectual property, product safety, age restricted sales, weights and measures, consumer credit, food standards and labeling, environmental trading standards, animal health and welfare. Subject: Consumer Law, *Law and Corporate Behaviour* Christopher Hodges, 2015-10-22 This book examines the theories and practice of how to control corporate behaviour through legal techniques. The principal theories examined are deterrence, economic rational acting, responsive regulation and the findings of behavioural psychology. Leading examples of the various approaches are given in order to illustrate the models private enforcement of law through litigation in the USA, public enforcement of competition law by the European Commission and the recent reform of policies on public enforcement of regulatory law in the United Kingdom. Noting that behavioural psychology has as yet had only limited application in legal and regulatory theory, the book then analyses various European regulatory structures where behavioural techniques can be seen or could be applied. Sectors examined include financial services, civil aviation, pharmaceuticals and workplace health safety. Key findings are that enforcement has to focus on identifying the causes of non-compliance so as to be able to support improved performance rather than be based on fear motivating complete compliance. Systems in which reporting is essential for safety only function with a no-blame culture. The book concludes by proposing an holistic model for maximising compliance within large organisations combining public regulatory and criminal controls with internal corporate systems and external influences by stakeholders held together by a unified core of ethical principles. Hence the book proposes a new theory of ethical regulation.
