Online Fall Strain Trilogy Book:

The Transmedia Vampire Simon Bacon, 2022-02-18 This book explores vampire narratives that have been expressed across multiple media and new technologies. Stories and characters such as Dracula, Carmilla, and even Draculaura from Monster High have been made more real through their depictions in narratives produced in and across different platforms. This also allows the consumer to engage on multiple levels with the vampire world, blurring the boundaries between real and imaginary realms and allowing for different kinds of identity to be created while questioning terms such as author, reader, player, and consumer. These essays investigate the consequences of such immersion and why the undead world of the transmedia vampire is so well suited to life in the 21st century.

Science Fiction, Fantasy and Horror Film Sequels, Series and Remakes Kim R. Holston, Tom Winchester, 2018-01-12 Science fiction, fantasy, and horror movies have spawned more sequels and remakes than any other film genre. Following Volume I which covered 400 films made 1931-1995, Volume II analyzes 334 releases from 1996 through 2016. The traditional cinematic monsters are represented: Dracula, Frankenstein, the Wolf Man, a new Mummy. A new wave of popular series inspired by comics and video games as well as The Lord of the Rings trilogy could never have been credibly produced without the advances in special effects technology. Audiences follow the exploits of superheroes like Captain America, Iron Man, Spider-Man, and Thor, and such heroines as the vampire Selene, zombie killer Alice, dystopian rebels Katniss Everdeen and Imperator Furiosa, and Soviet spy turned American agent Black Widow. The continuing depredations of Jason Voorhees, Freddy Krueger, and Michael Myers are described. Pre-1996 movies that have since been remade are included. Entries feature cast and credits, detailed synopsis, critics' reviews, and original analysis.

Beyond the Screen Sarah Atkinson, 2014-04-17 Runner up for the British Association of Film, Television, and Screen Studies Best Book Prize 2015, *Beyond the Screen* presents an expanded conceptualization of cinema which encompasses the myriad ways film can be experienced in a digitally networked society where the auditorium is now just one location amongst many in which audiences can encounter and engage with films. The book includes considerations of mobile web, social media, and live cinema through numerous examples and case studies of recent and near future developments. Through analyses of narrative, text, process, apparatus, and audience, this book traces the metamorphosis of an emerging cinema and maps the new spaces of spectatorship which are currently challenging what it means to be cinematic in a digitally networked era.
