

# Guide to good mental health

For people in Scotland

## What is mental health?

Mental health is about our emotions, feelings, and thoughts.

Sometimes people feel sad or stressed, and this is normal.

But when people feel like this often, it may be a sign of a mental health issue.

Mental health issues can affect your body too.

For example, when people worry a lot, they may notice their heart beats faster (or they feel sick).

Everyone needs to look after their mental health.

This guide is to help people understand more about mental health.

And learn how to take care of it.

**Diagnostic and Management Guidelines for Mental Disorders in Primary Care** World Health Organization, 1996 This book gives helpful guidelines on diagnosis for primary care physicians. It also provides guidelines on what to say to patients and their families, how to give them counselling, what medication to prescribe and when to consult a specialist. In short this volume presents the knowledge of mental health science in an easily understandable form for practitioners both physicians and others at the primary health care level. Two Versions of ICD 10 Chapter V Primary Care Version ICD 10 PC are presented here: 1 a concise version for those with medical training and prescription responsibility; 2 a brief version for primary care staff with other medical training. The primary care versions of the mental disorders classification were designed by an international group of general practitioners, family physicians, mental health workers, public health experts, social workers, psychiatrists and psychologists with a special interest in mental health problems in primary health care providers. After two rounds of revision the classification system was field tested in more than 40 countries by over 500 primary care physicians to assess its relevance, ease of use and reliability.
