Porter,1998      **Poland's competitiveness - worldwide and in the EU** Joanna Mastalerek,2004-02-23 Seminar paper from the year 2004 in the subject Politics Region Eastern Europe grade 1 5 A Hamburg University of Economy and Policy European Studies course Political Economy of Transition language English abstract Competitiveness is nowadays one of the central preoccupations of governments and industries worldwide Especially for reintegrating Central and Eastern European Countries CEECs into the world economy these countries national competitiveness plays a crucial role Even if national competitiveness has become a widespread concept there still exists no final definition as scientists point out Though a first orientation about the concept of competitiveness can provide Michael E Porter's approach in which he explains The only meaningful concept of competitiveness at the national level is national productivity No nation can be competitive in everything A nation's pool of human and other resources is necessarily limited The ideal is that these resources be deployed in the most productive uses possible Using Porter's definition as a first anchor for the assessment of Poland's competitiveness one has to closer examine Poland's level of national productivity      An Analysis of Michael E. Porter's Competitive Strategy Pádraig Belton,2017-07-05 Michael E. Porter's 1980 book Competitive Strategy is a fine example of critical thinking skills in action Porter used his strong evaluative skills to overturn much of the

accepted wisdom in the world of business. By exploring the strengths and weaknesses of the accepted argument that the best policy for firms to become more successful was to focus on expanding their market share, he was able to establish that the credibility of the argument was flawed. Porter did not believe such growth was the only way for a company to be successful and provided compelling arguments as to why this was not the case. His book shows how industries can be fragmented with different firms serving different parts of the market, the low price mass market and the expensive high end market in clothing for example, and examines strategies that businesses can follow in emerging, mature and declining markets. If printing is in decline for example, there may still be a market in this industry for high end goods and services such as luxury craft bookbinding. Porter also made excellent use of the critical thinking skill of analysis in writing *Competitive Strategy*. His advice that executives should analyze the five forces that mold the environment in which they compete, new entrants, substitute products, buyers, suppliers and industry rivals, focused heavily on defining the relationships between these disparate factors and urged readers to check the assumptions of their arguments. Porter avoided technical jargon and wrote in a straightforward way to help readers see that his evaluation of the problem was strong. *Competitive Strategy* went on to be a highly influential work in the world of business strategy.
