Automorphisms of Two-Generator Free Groups and Spaces of Isometric Actions on the Hyperbolic Plane William Goldman, Greg McShane, George Stantchev, Ser Peow Tan, 2019-06-10 The automorphisms of a two generator free group  $F$  acting on the space of orientation preserving isometric actions of  $F$  on hyperbolic 3 space defines a dynamical system. Those actions which preserve a hyperbolic plane but not an orientation on that plane is an invariant subsystem which reduces to an action of a group on by polynomial automorphisms preserving the cubic polynomial and an area form on the level surfaces

*Growing Up Tobacco Free* Institute of Medicine, Committee on Preventing Nicotine Addiction in Children and Youths, 1994-02-01 Tobacco use kills more people than any other addiction and we know that addiction starts in childhood and youth. We all agree that youths should not smoke but how can this be accomplished? What prevention messages will they find compelling? What effect does tobacco advertising more than 10 million worth every day have on youths? Can we responsibly and effectively restrict their access to tobacco products? These questions and more are addressed in *Growing Up Tobacco Free* prepared by the Institute of Medicine to help everyone understand the troubling issues surrounding youths and tobacco use. *Growing Up Tobacco Free* provides a readable explanation of nicotine's effects and the process of addiction and documents the search for an effective approach to preventing the use of cigarettes, chewing and spitting tobacco and snuff by children and youths. It covers the results of recent initiatives to limit young people's access to tobacco and discusses approaches to controls or bans on tobacco sales, price sensitivity among adolescents and arguments for and against taxation as a prevention strategy for tobacco use. The controversial area of tobacco advertising is thoroughly examined. With clear guidelines for public action, everyone can benefit by reading and acting on the messages in this comprehensive and compelling book.

**R Data Analysis without Programming** David W. Gerbing, 2013-12-13 This book prepares readers to analyze data and interpret statistical results using R more quickly than other texts. R is a challenging program to learn because code must be created to get started. To alleviate that challenge, Professor Gerbing developed lessR. LessR extensions remove the need to program. By introducing R through lessR, readers learn how to organize data for analysis, read the data into R and produce output without performing numerous functions and programming exercises first. With lessR, readers can select the necessary procedure and change the relevant variables without programming. The text reviews basic statistical procedures with the lessR enhancements added to the standard R environment. Through the use of lessR, R becomes immediately accessible to the novice user and easier to use for the experienced user. Highlights of the book include Quick Starts that introduce readers to the concepts and commands reviewed in the chapters. Margin notes that highlight, define, illustrate and cross reference the key concepts. When readers encounter a term previously discussed, the margin notes identify the page number to the initial introduction. Scenarios that highlight the use of a specific analysis followed by the corresponding R lessR input and an interpretation of the resulting output. Numerous examples of output from psychology

business education and other social sciences that demonstrate how to interpret results Two data sets provided on the website and analyzed multiple times in the book provide continuity throughout End of chapter worked problems help readers test their understanding of the concepts A website at [www. lessRstats.com](http://www. lessRstats.com) that features the lessR program the book s data sets referenced in standard text and SPSS formats so readers can practice using R lessR by working through the text examples and worked problems PDF slides for each chapter solutions to the book s worked problems links to R lessR videos to help readers better understand the program and more An ideal supplement for graduate or advanced undergraduate courses in statistics research methods or any course in which R is used taught in departments of psychology business education and other social and health sciences this book is also appreciated by researchers interested in using R for their data analysis Prerequisites include basic statistical knowledge Knowledge of R is not assumed
