The British Study Edition of the Urantia Papers Book [A4 PDF] ,      All Necessary Measures? Ian Martin, 2022-04-15 The international intervention after the 2011 Libyan uprising against Muammar Gaddafi was initially considered a remarkable success the UN Security Council's first application of the responsibility to protect doctrine an impending civilian massacre prevented and an opportunity for democratic forces to lead Libya out of a forty year dictatorship But such optimism was soon dashed Successive governments failed to establish authority over the ever proliferating armed groups divisions among regions and cities Islamists and others split the country into rival administrations and exploded into civil war external intervention escalated Ian Martin gives his first hand view of the questions raised by the international engagement Was it a justified response to the threat against civilians What brought about the Security Council resolutions including authorising military action How did NATO act upon that authorisation What role did Special Forces operations play in the rebels victory Was a peaceful political settlement ever possible What post conflict planning was undertaken and should or could there have been a major peacekeeping or stabilisation mission during the transition Was the first election held too soon As Western interventions are reassessed and Libya continues to struggle for stability this is a unique account of a critical period by a senior international official who was close to the events      Political Rationale and International Consequences of the War in Libya Dag Henriksen, Ann Karin Larssen, 2016 Political Rationale and International Consequences of the War in Libya focuses on the international intervention in Libya in 2011 and tries to answer two broad questions 1 What was the political rationale for the various actors to proceed as they did in the lead up and conduct of the military intervention in Libya 2 What are the consequences of the UN authorized military intervention in Libya R2P was the public raison d'etre of the war and an important legitimizing factor of the intervention Still the humanitarian situation was a necessary but not in and by itself an adequate precondition for intervention A number of factors coalesced to enable the intervention While the humanitarian situation triggered the intervention in reality a variety of national interests governed the approach by the various international actors and more often than not these motives were not rooted in the particular circumstances in Libya The book offers a combination of unique perspectives While the perspectives of the US France and the UK on the Libyan Crisis War have been well documented the Arabic and Scandinavian political and military dynamics have been much less so While the perspectives of NATO the UN and R2P have been debated the view from the Arab League and African Union AU have been less in focus The volume redresses that imbalance and offers the most broad ranging analysis yet of a key moment in recent international relations      **Christian-Muslim Dialogue in Northern Nigeria** Thaddeus Byimui Umaru, 2013-08-14 Religion as a powerful impulse in human existence plays a paradoxical role in society as it both contributes significantly in shaping the spiritual socio political and economic lives of millions of people and also acts as a source of conflict The sad experience of interreligious conflict in Northern Nigeria challenges the claim of Islam and Christianity to be religions of peace However

understood as closely intertwined with culture and custom of a people religion can be central in the establishment of peace and conflict resolution in and between communities This text using the model of dialogue Nostra Aetate explores and presents the socio political and theological resources available in Northern Nigeria the locality for a consistent peace building process The Aftermath of the Arab Uprisings Samir Makdisi, Raimundo Soto, 2023-03-17 Unlike other books on the Arab uprisings of 2010 2011 which focus on why they occurred this book looks instead towards the future of three countries Syria Libya and Yemen where the violence and instability initiated by the uprisings persist It additionally examines the case of Iraq which continues to suffer from a precarious political situation introduced by the US led invasion of 2003 The book investigates what should be done to achieve inclusive political and economic development and eventually a lasting peace It describes the particular circumstances in each of the four countries and analyses the common challenges facing them such as the need to achieve economic diversification control inflation raise employment levels husband fiscal expenditures control corruption and implement transparent policies It argues that in the four countries any lasting settlement must involve an explicitly stated new social contract that lays the foundation for inclusive socio economic development and a genuinely democratic environment In addition a massive transformation is required of the institutional fabric of society that is the set of key institutions that helped create the conditions for conflict Moreover the book argues that any successful transition hinges on anticipating the potential for political and economic development that an eventual peace agreement will open This can only be done by envisioning and planning the reforms that ought to be implemented and building up political support for the transition phase **Harmonious Intervention** Chiung-Chiu Huang, Chih-yu Shih, 2016-04-22 Two major features of international relations at the beginning of the 21st century are global governance and the rise of China Global governance advocating global norms requires intervention into sovereign domains in defiance of those norms However an ascendant China adheres to a classic stance on sovereign integrity which prohibits such intervention Whether or not China will ultimately Sinicize global governance or become assimilated into global norms remains both a theoretical and a practical challenge Both challenges come from China's alternative style of global governance which embodies the doctrine of balance of relationship in contrast with the familiar international relations embedded in balance of power or balance of interest An understanding of China's intervention policy based upon the logic of balance of relationship is therefore the key to tackling the anxiety precipitated by these theoretical as well as practical challenges The Tablet, 2004 The international Catholic weekly
