**Energy Efficiency in Buildings** José Manuel Andújar,Sergio Gómez Melgar,2020-04-28 Buildings are one of the main causes of the emission of greenhouse gases in the world Europe alone is responsible for more than 30% of emissions or about 900 million tons of CO2 per year Heating and air conditioning are the main cause of greenhouse gas emissions in buildings Most buildings currently in use were built with poor energy efficiency criteria or depending on the country and the date of construction none at all Therefore regardless of whether construction regulations are becoming stricter the real challenge nowadays is the energy rehabilitation of existing buildings It is currently a priority to reduce or ideally eliminate the waste of energy in buildings and at the same time supply the necessary energy through renewable sources The first can be achieved by improving the architectural design construction methods and materials used as well as the efficiency of the facilities and systems the second can be achieved through the integration of renewable energy wind solar geothermal etc in buildings In any case regardless of whether the energy used is renewable or not the efficiency must always be taken into account The most profitable and clean energy is that which is not consumed

SketchUp 4.0 for Windows ,2004 SketchUp is software designed to accommodate your personal design process Too often it is your process that must accommodate software Start with massing and loose proportions and then add detail as you go Or if you need to draw more accurately SketchUp can accept exact dimensions or exchange precision data with industry standard CAD systems at any time Unlike CAD you can approach design problems at the level of abstraction that is appropriate to your design goals even as they change throughout a project page 8

**SketchUp to LayOut** Matt Donley,2014-01-31 The SketchUp to LayOut book is the essential guide for woodworkers carpenters architects contractors builders and designers who already know the basics on how to use SketchUp but are looking to create stunning presentations to visualize their ideas with their clients using LayOut Learn the workflow for creating models specifically for LayOut Before you even begin modeling that first rectangle you ll need to fully understand which type of model you should be building for LayOut Don t make the mistake of creating twice the amount of work for yourself because you didn t properly organize your model ahead of time I ll teach you how to save time and frustration by organizing your model so YOU are in control of how your model viewports look The entire first half of the book is dedicated to preparing your model for LayOut From organizational workflow to scenes and styles I share with you my 5 point method I use to visualize and prepare every scene I create for LayOut Not only will you understand exactly what those five points are you ll learn multiple ways to control them Using these methods you will gain complete control over the look of your viewports in LayOut You will master every aspect of a SketchUp scene and style to enable you to create impressive presentations and drawings in the least amount of time possible Is this too advanced for me This book is designed for construction professionals who don t have any prior experience in LayOut at all But it s also structured in a way that lets you look up specific tasks or methods without having to read the book cover to cover I ll save you all the time and frustration that I went through when I first learned LayOut by quickly orienting you with the workspace then jumping right in to creating your own titleblock inserting SketchUp models and adding dimensions You should have some basic knowledge on how to use SketchUp But if you re just starting out you ll have complete access to my entire library of tutorials and videos for free on my website to bring you up to speed quickly Every important aspect of LayOut is explained in the book with step by step instructions for you to follow along Learn exactly what you need to know and skip over all the little details you don t need to
