**Joss Whedon and Religion** Anthony R. Mills, John W. Morehead, J. Ryan Parker, 2013-09-27 This is a collection of new essays on the religious themes in and the implications of the works of Joss Whedon creator of such shows as Buffy the Vampire Slayer Angel and Firefly and more recently writer and director of the box office hit Marvel's The Avengers. The book addresses such topics as ethics, racism, feminism, politics, witchcraft, spiritual transformation, identity, community, heroism, apocalypse and other theologically significant themes of Whedon's creative enterprises. The disciplinary approaches vary as well: history, theology, philosophy of religion, phenomenology, cultural studies and religious studies are all employed. The various essay authors differ in that some are clearly believers in God, some are clearly not and others leave that matter aside.

*Communicating Biological Sciences* Richard Elliott, 2016-05-23 Recent scandals in the biosciences have highlighted the perils of communicating science, leading many observers to ask questions about the pressures on scientists and the media to hype up claims of scientific breakthroughs. Journalists, science writers and scientists themselves have to report complex and rapidly developing scientific issues to society yet work within conceptual and temporal constraints that shape their communication. To date there has been little reflection on the ethical implications of science writing and science communication in an era of rapid change. *Communicating Biological Sciences* discusses the ethics of science communication in light of recent developments in biotechnology and biomedicine. It focuses on the role of metaphors in the creation of visions and the framing of scientific advances as well as their impact on patterns of public acceptance and rejection, trust and scepticism. Its rigorous investigation will appeal not only to science writers and scientists but also to scholars of sociology, science and technology studies, media and journalism.

*Heaven on Earth* Richard Landes, 2011-08-04 A comprehensive examination of millennialism, the belief that the grandest events of history and the cosmos will occur soon and suddenly, whether as a religious dénouement with the coming of the Last Days or as a final social solution to resolve the human predicament forever. Through analysis of diverse cases throughout history, Richard Landes demonstrates that millennialism has been deliberately downplayed and even ignored by historians and shows that millenarian beliefs have played a role in many supposedly secular events, movements and periods, including modernity.

**Religion and Doctor Who** Andrew Crome, James F. McGrath, 2013-11-14 Doctor Who has always contained a rich current of religious themes and ideas. In its very first episode it asked how humans rationalize the seemingly supernatural as two snooping schoolteachers refused to accept that the TARDIS was real. More recently it has toyed with the mystery of Doctor's real name, perhaps an echo of ancient religions and rituals in which knowledge of the secret name of a god, angel or demon was thought to grant a mortal power over the entity. But why does Doctor Who intersect with religion so often and what do such instances tell us about the society that produces the show and the viewers who engage with it? The writers of *Religion and Doctor Who: Time and Relative Dimensions in Faith* attempt to answer these questions through an in-depth analysis of the various treatments of

religion throughout every era of the show's history. While the majority of chapters focus on the television show Doctor Who, the authors also look at audios, novels and the response of fandom. Their analyses, all written in an accessible but academically thorough style, reveal that examining religion in a long running series such as Doctor Who can contribute to a number of key debates within faith communities and religious history. Most importantly, it provides another way of looking at why Doctor Who continues to inspire, to engage and to excite generations of passionate fans whatever their position on faith. The contributors are drawn from the UK, the USA and Australia, and their approaches are similarly diverse. Chapters have been written by film scholars and sociologists, theologians and historians, rhetoricians, philosophers and anthropologists. Some write from the perspective of a particular faith or belief, others write from the perspective of no religious belief. All however demonstrate a solid knowledge of and affection for the brilliance of Doctor Who.

**Index Islamicus**, 2003 **The Public Eye**, 2007 A journal of social and political issues. **Culture Wars** Roger Chapman, 2010. Featuring hundreds of A-Z entries and numerous photos, the set examines the history and relevance of the issues, events, controversies, personalities, groups and concepts that have contributed to the political and social polarization of American society over recent decades. It details hot button topics as well as the role of the media in defining and shaping these issues, everything from abortion, the Christian Coalition, the environmental movement, feminism and gay rights to illegal aliens, pornography, stem cell research, Watergate and zero tolerance. A topic finder, bibliography and index add to the set's utility.

**LA Record**, 2000 **Shadows of Cavernous Shades** Erik Persson, 2002 **The World Will Burn** Renato Cardoso, 2020-07-13. Science asserts that our planet is on the path to imminent collapse. How much time do we have left? What will happen to our souls when the end comes as the Bible foretells? All of us wonder at some time in our lives what the future holds for each one of us. To clarify our many uncertainties about the fate of humanity, Renato Cardoso relates the answers contained in the Book of Revelation in a simple and straightforward narrative. Based on the events foreseen in the last book of the Bible and backed up by scientific data, this book details in depth revelations about the end of times and the final destiny of humanity as described by the apostle John.

But it works Because it's about you Theistic Paradigm is not a promise of an easy path It is an explanation of why the Path matters **Balancing God, Science, and Technology in the End Times** Juanita Werrett, 2021-01-18 It is critical in this day of discovery and augmented scientific knowledge that we come to an accurate balance of understanding between foundational science and foundational religion We are facing a technology that is moving at enormous speed We need to understand the precarious status of humans as we enter and live through the future technology era that is upon us Humanity could be negatively affected by technology either unintentionally or by design As we move forward ethical and moral decisions will be confronted as to how we manage AI artificial intelligence robots avatars and the huge data gathering process associated with the tech industries being formulated at this moment Controversy will rage but solutions will percolate The truth is you and I are the product in the new global technology paradigm and our information will feed AI the data eating beast Pandora's box is open Science and technology are leapfrogging forward at an exponential pace There is no mechanism to stop it except God God's children are weighted and wired for spiritual success True doctrines and ordinances of the Gospel of Christ fortify faith and give Christians hope in His return Spiritual development and power comes to those who are prepared and willing to stand with Christ The fuller blessings may be ours in spite of the underlying challenges Perhaps it is fortunate that we live in the fullness of time and the fast approaching premillennial era The righteous will be saved in life or death Some may be blessed to witness the glorious Second Coming of the Savior
