The Law of the Sea and Maritime Boundary Disputes in Areas of Hydrocarbon Potential Vivek Chandra, 2023-09-22 The United Nations Convention on the Law of Sea UNCLOS is hailed as one of the most significant multilateral legal agreements executed in the past few decades. However, its shortcomings are neither trivial nor inconsequential, especially regarding maritime boundary disputes involving hydrocarbon resources. This monograph examines the relationship between UNCLOS and maritime boundaries in five non-polar regions encompassing almost 90% of global unresolved disputes involving offshore hydrocarbon development. The regions which include the eastern Mediterranean, the Caspian Sea, the Persian Gulf, northeast Asia, and the South China Sea were chosen for their oil and gas resources potential and recent military skirmishes that have the potential to lead to wider regional confrontations. The book addresses each region's maritime boundary status in the context of specific articles within UNCLOS that have been exploited by disputing states to justify their overlapping claims. The history and future applicability of multilateral Joint Development Area agreements for each region are evaluated for their potential to provide a cooperative solution to resolve ongoing tensions. Highlighting the limitations of current gun boat diplomacy, the monograph makes practical suggestions for new paradigms for resolving outstanding disputes, promoting lasting peace and generating economic benefits resulting from resource development.

Japan's Nationalist Right in the Internet Age Jeffrey J. Hall, 2021-04-07 Japan's nationalist right have used the internet to organize offline activism in increasingly visible ways. Hall investigates the role of internet-mediated activism in Japan's ongoing historical and territorial disputes. He explores the emergence of two right-wing activist organizations, Nihon Bunka Channel Sakura and Ganbare Nippon, which have played a significant role in pressure campaigns against Japanese media outlets, campaigns to influence historical memorials, and campaigns to assert Japan's territorial claim to the Senkaku/Diaoyu Islands. Taking a multi-disciplinary approach, he analyses how activists maintained cohesion, raised funds, held protests that regularly drew hundreds to thousands of participants, and used fishing boats to land activists on disputed islands. Detailing events that took place between 2004 and 2020, he demonstrates how skilled social actors built cohesive grassroots protest organizations through the creation of shared meaning for their organization and its supporters. A valuable read both for scholars seeking insight into the dynamics surrounding Japan's history disputes and territorial issues as well as those seeking to compare Japanese right-wing internet activism with its counterparts elsewhere.

Geopolitics, Military Modernisation and the Future of the Indo-Pacific Bates Gill, Adam Lockyer, Yves-Heng Lim, Andrew T. H. Tan, 2024-08-02 This book examines to what extent geopolitics explains the current wave of force modernisation in the Indo-Pacific region. Examining the leading Indo-Pacific nations in terms of defence spending, the United States, China, India, Japan, South Korea, Australia, Taiwan, Singapore, Pakistan, Indonesia, and Thailand, geopolitical principles are used to create hypotheses that can be tested against the military modernisation programmes of the major actors in the Indo-Pacific region. The book represents a bridge between reference

works and the literature on international politics in the Indo Pacific The empirical chapters provide qualitative narratives that explore the force postures military modernisation and procurement patterns of the cases and assess why these nations military modernisation has followed particular courses and evaluate this evidence against the expectations of geopolitics and its rivals This book will be a valuable addition to scholars practitioners and indeed anyone interested in the future stability of one of the world s most important and dynamic regions Buddhist Exchanges Between India and Japan Ranjana

Economy of the Renminbi Hyoungh-kyu Chey, 2021-11-10 Although the internationalization of the Chinese renminbi is an important international political event most of the studies of it place their analytical focuses largely just on China itself the issuer of the currency In contrast this book addresses the question of how foreign states have responded to the renminbi s internationalization during its initial phase through the 2010s and thereby breaks new ground in exploring the international politics of currency internationalization It builds a theoretical framework for analyzing a state s policy toward renminbi internationalization developing the key concept of reactive currency statecraft It then applies this framework to the four select cases of the United Kingdom Japan South Korea and the United States This book reveals that all four of these countries have deliberately utilized their policies related to renminbi internationalization as means of achieving their own foreign policy goals associated with China goals that have been principally economic in some cases but political in others

Remarkably the predominant mode of response to the renminbi's internationalization has been accommodative. Even the United States and Japan, China's chief geopolitical and also international currency rivals, have never attempted to actively suppress it. This study provides new insights to anyone concerned with the transformation of the world monetary order while also contributing a valuable analysis of the international politics surrounding the rise of China. **Majority-minority Relations** John E. Japan was sometimes described as a country of peace during the Cold War period in contrast to the continental border conflicts taking place at the time, such as the China-Soviet rivalry. However, as the maritime frontier was rediscovered and defined by the regional powers and legal refinements of the 1970s, the process of states seeking a secure maritime zone has accelerated, and maritime rivalries have become as intense as inland rivalries. This book examines the territorial disputes souring relations between Japan and its three neighbours: Russia, South Korea, and China. It combines an empirical study with theoretical advancements in comparative research to understand the Cold War and post-Cold War border issues related to Japan, particularly the Northern Territories/South Kurils dispute with Russia, Takeshima/Dokdo with Korea, and Senkaku/Diaoyu with China and Taiwan. Based on the history of negotiations with the Soviet Union and Russia over the course of fifty years, the study offers a series of practical suggestions to enable these disputes to be separated from arguments over their history and resolved on the basis of the principle of mutual advantage for those affected by them. This book provides not only the key to resolving these three disputes affecting East Asia but the framework in which to seek the resolution of other territorial issues worldwide. Explaining the history and possible outcomes of Japan's territorial disputes with Russia, South Korea, and China.

whilst providing concrete steps for resolving entrenched territorial disputes this book will be of great interest to students and scholars of International Relations Japanese Politics and International Law
