[Learners Without Borders](#) Yong Zhao, 2021-06-30 The future of education centers empowered students in a global learning ecosystem Despite decades of reform the traditional borders of education graduation curriculum classrooms schools have failed to deliver on the goals of excellence and equity Despite massive societal changes education remains controlled by an old mindset It is time to change that limiting mindset and more importantly the ineffective practices in education To truly serve all learners future classrooms must remove the boundaries of learning and become student centered culturally responsive and personalized supportive and equitable environments where each student can direct their own learning and seek multiple pathways to skills and knowledge in a global learning ecosystem This compelling call for transformative change offers all involved in education Evidence based arguments that reveal the need to break the traditional borders that limit learning Strategies to personalize learning and remove the confinement of traditional pathways Examples from around the world to create equitable and student centric learning environments Resources for creating a school learning environment that expands opportunities for personalized learning into the global learning ecosystem It is time to now imagine a different kind of learning without borders and to begin the shifts in practice that will result in personalized learning for all students

[The Limits of Science](#) Ernest Krausz, 2000 The Limits of Science provides a clear and concise account of how scientists explain the reality we live in The author presents a vivid and balanced picture of both the natural and social sciences by stressing science s uncertainties and failures as well as its tremendous achievements in our modern age Ernest Krausz conveys a strong message in The Limits of Science science is not the know all that it is often imagined to be Scientists constantly arrive at the same limits of ultimately hidden causes and unanswered questions Science does not provide answers even to basic questions such as how mass is generated or how living organisms originated and it does not provide a proper understanding of human consciousness Highlighting the limits of science this book adds new perspectives to our ideas and beliefs about the world
