**Statistics for Lawyers** Michael O. Finkelstein, Bruce Levin, 2024-12-30 This classic text first published in 1990 is designed to introduce law students, law teachers, practitioners, and judges to the basic ideas of mathematical probability and statistics as they have been applied in the law. The fourth edition includes fourteen new sections, four inserts to the statistical text, and six new answer sections on topics including the following: Use of prior probabilities after DNA database searches, Lipitor and diabetes, Harvard's affirmative action practices in admissions, New York City garbage trucks, Tests of odds ratio homogeneity, Disparate impact of a pre-employment exam on minority applicants, Liraglutide and pancreatic cancer, Representative sampling, Reversals in death penalty cases, Technology assisted review in e-discovery, Asbestos and colon cancer, Guilty pleas in the federal courts, The financing secured event study, and Average marginal effects. The book consists of sections of exposition followed by real world cases and case studies in which statistical data have played a role. The reader is asked to apply the theory to the facts to calculate results; a hand calculator is sufficient and to explore legal issues raised by quantitative findings. The authors' calculations and comments are given in the back of the book. As with previous editions, the cases and case studies reflect a broad variety of legal subjects including antidiscrimination, mass torts, taxation, school finance, identification, evidence, preventive detention, handwriting disputes, voting, environmental protection, antitrust, sampling for insurance audits, and the death penalty.

*eBook: Corporate Finance 5e* David Hillier, 2024-02-12 The fifth European edition of Corporate Finance takes an applied approach to cover all the latest research and topic areas important to students taking Finance courses. The new edition provides an international perspective on all areas of corporate finance and has been updated to include discussion on current trends such as the integrated nature of global supply chains, financial risk management, and key regulatory changes impacting the sector. It addresses the impact that FinTech, the climate, and geopolitics are having on the development of corporate finance, considers the questions brought about by the global corona virus pandemic, and looks to the future of the industry. Understanding and Application Clear user friendly style Example boxes in every chapter provide hypothetical examples to illustrate theoretical concepts such as cash flow timing, dividend smoothing, and differential growth. Real World Insight boxes use companies like Apple, Volkswagen, and Adidas to show how they have applied corporate finance theories and concepts to their business decisions. Chapter links throughout provide quick cross referencing to show the connections between topics. Practice and Proficiency Mini and Practical cases present scenarios and questions to practice application and learning. Questions and Problems in each chapter categorised by topic and level of difficulty allow for rigorous testing of the chapter content. Numbered maths equations and key notation boxes listing the variables and acronyms that will be encountered in each chapter designed to encourage mastery of Maths. Exam Questions designed to take 45 minutes and test you on material learned in a more formal exam style. Connect resources include algorithmic questions designed to ensure equations and calculations are not learned by rote but by thorough understanding.

Master MATLAB tools for creating machine learning applications through effective code writing guided by practical examples showcasing the versatility of machine learning in real world applications Key Features Work with the MATLAB Machine

Learning Toolbox to implement a variety of machine learning algorithms Evaluate deploy and operationalize your custom

models incorporating bias detection and pipeline monitoring Uncover effective approaches to deep learning for computer

vision time series analysis and forecasting Purchase of the print or Kindle book includes a free PDF eBook Book

DescriptionDiscover why the MATLAB programming environment is highly favored by researchers and math experts for

machine learning with this guide which is designed to enhance your proficiency in both machine learning and deep learning

using MATLAB paving the way for advanced applications By navigating the versatile machine learning tools in the MATLAB

environment you'll learn how to seamlessly interact with the workspace You'll then move on to data cleansing data mining

and analyzing various types of data in machine learning and visualize data values on a graph As you progress you'll explore

various classification and regression techniques skillfully applying them with MATLAB functions This book teaches you the

essentials of neural networks guiding you through data fitting pattern recognition and cluster analysis You'll also explore

feature selection and extraction techniques for performance improvement through dimensionality reduction Finally you ll leverage MATLAB tools for deep learning and managing convolutional neural networks By the end of the book you ll be able to put it all together by applying major machine learning algorithms in real world scenarios What you will learn Discover different ways to transform data into valuable insights Explore the different types of regression techniques Grasp the basics of classification through Naive Bayes and decision trees Use clustering to group data based on similarity measures Perform data fitting pattern recognition and cluster analysis Implement feature selection and extraction for dimensionality reduction Harness MATLAB tools for deep learning exploration Who this book is for This book is for ML engineers data scientists DL engineers and CV NLP engineers who want to use MATLAB for machine learning and deep learning A fundamental understanding of programming concepts is necessary to get started
