in processes of a sustainable change Prof. Dr. Michael Kurwan, 2025-06-30 Document from the year 2025 in the subject
Leadership and Human Resources Leadership language English abstract In order to successfully implement sustainable
changes in a company in the context of change processes strong leadership is required at the top of a company which should
have a great deal of empathy and a sure instinct in order to position the company in the market in the long term and
profitably In order to successfully shape these sustainable changes it will not be the famous power of the leader of the past
but will only work with the involvement of employees in the new world of work in the knowledge age which is characterized
by digitalization and artificial intelligence This new form of leadership is also referred to as Leadership 2 0 in which it is
important to retain top performers and in particular key personnel in the company in the long term which is a very
challenging leadership task in HR management In change processes a fundamental distinction must be made between
incremental change management and radical change management While incremental change takes place continuously and is
integrated into everyday working life radical change represents a strategic realignment of the company which is largely
associated with staff reductions and is intended to change the corporate culture This is particularly true in the case of
restructuring where cost cutting programs play a decisive role in ensuring the long term survival of the company Employees
are more willing to go along with incremental change also known as continuous improvement than radical change as they
could also be affected by staff cuts This fuels employees fears and therefore often leads to high staff turnover **The**
