Paving Towards Authentic Chemistry Teaching:

Paving the way towards authentic chemistry teaching - A contribution to teachers' professional development Andrea Schumacher, 2015-05-15 Ein angemessenes Verständnis der Naturwissenschaften stellt eine Schlüsselkomponente naturwissenschaftlicher Grundbildung dar. Für die entsprechende unterrichtliche Gestaltung spielen die Vorstellungen der Lehrkräfte der Naturwissenschaften eine entscheidende Rolle und anwendbares Meta-Wissen gilt als zu erreichende Qualifikation im Lehramtsstudium. Im vorliegenden Forschungsprojekt wird im Rahmen von qualitativen Studien erhoben, welche Vorstellungen Lehramtsstudierende der Chemie als Naturwissenschaft besitzen und wie die Studierenden unterstützt werden können, ein fundiertes Verständnis zu entwickeln und dieses praktisch zu transformieren. Auf Grundlage der Ergebnisse wird ein Modul für die Lehrerbildung entwickelt, das den Weg bereitet, authentisch der Chemie zu unterrichten. An adequate understanding about science represents one key component of scientific literacy. Teachers' conceptions about science play a crucial role for the design of appropriate lessons and applicable meta-knowledge is considered as a qualification to be achieved during university teacher education. In this thesis, qualitative studies are conducted to evaluate which pre-conceptions about chemistry as a science teacher students possess and how students can be supported in developing an informed understanding as well as in practically transforming it. On the basis of the results, a module for teacher education is developed, which paves the way for authentic chemistry teaching. *Paving the Way Towards Authentic Chemistry Teaching* Andrea Schumacher, 2015

Representations of Nature of Science in School Science Textbooks Christine McDonald, Fouad Abd-El-Khalick, 2017-04-21 Bringing together international research on nature of science (NOS) representations in science textbooks, the unique analyses presented in this volume provide a global perspective on NOS from elementary to college level and discuss the practical implications in various regions across the globe. Contributing authors highlight the similarities and differences in NOS representations and provide recommendations for future science textbooks. This comprehensive analysis is a definitive reference work for the field of science education. *Journal of the Society of Chemical Industry* Society of Chemical Industry (Great Britain), 1898 Includes list of members 1882-1902 and proceedings of the annual meetings and various supplements

Chemical Properties of Asphalts and Their Effects on Pavement Performance Raymond E. Robertson, 2000 The purpose of this Circular is to familiarize the asphalt user with the source of asphalt, the variable chemistry of asphalt, why variable performance should be expected when asphalt is used in roadways, and what is currently missing from the specification process. Several areas are identified where refinements in the specification process would improve the ability to classify asphalts by their expected performance. This Circular summarizes more than 2500 pages written during the past 20 years on the effects of fundamental chemistry on the rheological properties of asphalt. This Circular should be especially useful to civil engineering students who intend to work in some highway construction-related business.
