**Text Mining and Visualization** Markus Hofmann, Andrew Chisholm, 2016-01-05 Text Mining and Visualization Case Studies Using Open Source Tools provides an introduction to text mining using some of the most popular and powerful open source tools KNIME RapidMiner Weka R and Python. The contributors are all highly experienced with text mining and open source software and explain how text data are gathered and processed from a wide range of sources. **Dark Web** Hsinchun Chen, 2011-12-16 The University of Arizona Artificial Intelligence Lab AI Lab Dark Web project is a long term scientific research program that aims to study and understand the international terrorism, Jihadist phenomena via a computational data centric approach. We aim to collect ALL web content generated by international terrorist groups including web sites, forums, chat rooms, blogs, social networking sites, videos, virtual world, etc. We have developed various multilingual data mining, text mining and web mining techniques to perform link analysis, content analysis, web metrics, technical sophistication analysis, sentiment analysis, authorship analysis and video analysis in our research. The approaches and methods developed in this project contribute to advancing the field of Intelligence and Security Informatics (ISI). Such advances will help related stakeholders to perform terrorism research and facilitate international security and peace. This monograph aims to provide an overview of the Dark Web landscape, suggest a systematic computational approach to understanding the problems and illustrate with selected techniques, methods and case studies developed by the University of Arizona AI Lab Dark Web team members. This work aims to provide an interdisciplinary and understandable monograph about Dark Web research along three dimensions: methodological issues in Dark Web research, database and computational techniques to support information collection and data mining, and legal, social, privacy and data confidentiality challenges and approaches. It will bring useful knowledge to scientists, security professionals, counterterrorism experts and policy makers. The monograph can also serve as a reference material or textbook in graduate level courses related to information security, information policy, information assurance, information systems, terrorism and public policy. **Intelligence and Security Informatics** Daniel Ortiz-Arroyo, 2008-11-24 This book constitutes the refereed proceedings of the First European Conference on Intelligence and Security Informatics (EuroISI 2008) held in Esbjerg, Denmark, in December 2008. The 23 revised full papers and 2 revised poster papers presented were carefully reviewed and selected from 48 submissions. The papers are organized in topical sections on criminal and social network analysis, intelligence analysis and knowledge discovery, Web based intelligence monitoring and analysis, privacy protection, access control and digital rights management, malware and intrusion detection, as well as surveillance and crisis management. **Advancing Educational Research With Emerging Technology** Kennedy, Eugene, Qian, Yufeng, 2019-11-29 Advances in technology and media have fundamentally changed the way people perceive research, how research studies are conducted and the ways data are analyzed. How the findings are presented. Emerging internet enabled technological tools have enhanced and transformed research in education and the way educators must adapt to conduct
