Oldstone, 2017-07-18 Ebola's Curse 2013 2016 Outbreak in West Africa is about hemorrhagic fever viruses especially Ebola its initial origin in central Africa 1976 its unprecedented appearance in West Africa in 2013 The book records in sequence and detective style how the initial outbreak of Ebola from the index case in rural Guinea traveled to Sierra Leone the work and fate of those working in the Kenema Government Hospital KGH isolation ward in Sierra Leone The book provides vignettes of the three main players involved with Ebola at KGH Sheik Khan Pardis Sabeti and Robert Garry Khan was the head of the unit declared a national hero by his Sierra Leone government He died fighting Ebola and was is recognized in the USA by American societies by awards created for his historic work and death Pardis Sabeti a geneticist from Harvard and Broad MIT Institute who was honored as a Scientist of the Year by Time Magazine and the Smithsonian Institute Robert Garry head of the operation to fight hemorrhagic fevers and Ebola shuttled between Tulane University KGH and The White House to make aware through the press and others the dilemma and tragedy that was unfolding and the need to obtain additional medical and health care support and supplies Sabeti and Garry currently work with Oldstone on Ebola at KGH and thus personal communication and knowledge was is available to the author for the book Includes perspectives from the 2013 2016 outbreak in West Africa Provides a detailed overview of the origins of Ebola virus through present day discoveries Written with an integrative approach incorporating scientific research with insights from the field on Public Health and Medical History *Chinese Investment in Africa* David N.

Abdulai, 2016-11-03 China leads the world when it comes to investment and influence on the African continent The extent of Chinese investment in Africa is well known and much has been written about China's foray into Africa However most of the available material has approached this issue by looking at China as the New Colonialist more interested in Africa's vast natural resources than working in partnership for sustained development Whilst China's interest in Africa's resources is evident it is just half of the story China's foray into Africa goes beyond its appetite for natural resources and into the realm of geo politics and international political economics For example China is all too aware of how it can cultivate Africa's support on global issues at the United Nations and at other international fora Breaking free from the binary arguments and analysis which characterize this topic Professor Abdulai presents a refreshing perspective that China's foray into Africa can produce win win outcomes for China and Africa if Africans really know what they want from China Hitherto each African country has tended to engage China with an individual bucket list acting in isolation and not as part of a wider continent indeed Africa and the African Union does not yet have a coordinated policy towards China For Africa to be able to do that it needs to know where China is coming from the factors that contributed to its awakening and success and the benefits and possible pitfalls of this foray in order to better position itself for a win win engagement with China This book will be a valuable read for policy makers think tanks and students of Africa China studies programmes alike *The Ebola Epidemic* Connie

Goldsmith, 2016-01-01 An ordinary blue thermos holding blood samples from a sick nun in Zaire reached Belgium's Institute

of Tropical Medicine in September 1976 From the samples researchers discovered a new virus which they named the Ebola virus after a river in Central Africa The virus killed two hundred eighty people before it seemingly disappeared into the jungle No one suspected the virus would erupt in West Africa nearly four decades later to cause an unprecedented epidemic Ebola has riveted and terrified the world since its reemergence from the jungle killing more than eleven thousand people in West Africa since December 2013 Transmitted through bodily fluids blood saliva sweat vomit feces and semen the disease causes high fever widespread pain nausea and vomiting and severe diarrhea Patients may develop dangerous bleeding and organ failure With no effective treatment available about 40 percent of infected people die within days Using proper protective gear safe burial protocols cleansing techniques and educational outreach the disease has been slowed in Liberia Guinea and Sierra Leone at least temporarily Can researchers develop vaccines quickly enough to prevent new outbreaks Will Ebola move beyond West Africa Readers will hear from Ebola survivors learn what experts say about this devastating disease and draw their own conclusions about whether another epidemic can be prevented Feigin and Cherry's Textbook of Pediatric Infectious Diseases E-Book James Cherry,Gail J.
