Generative Adversarial Networks for Image Generation XUDONG. LI MAO (QING.),Qing Li,2022-03-04 Generative adversarial networks GANs were introduced by Ian Goodfellow and his co authors including Yoshua Bengio in 2014 and were to referred by Yann Lecun Facebook s AI research director as the most interesting idea in the last 10 years in ML GANs potential is huge because they can learn to mimic any distribution of data which means they can be taught to create worlds similar to our own in any domain images music speech prose They are robot artists in a sense and

their output is remarkable poignant even In 2018 Christie's sold a portrait that had been generated by a GAN for 432 000 Although image generation has been challenging GAN image generation has proved to be very successful and impressive However there are two remaining challenges for GAN image generation the quality of the generated image and the training stability This book first provides an overview of GANs and then discusses the task of image generation and the details of GAN image generation It also investigates a number of approaches to address the two remaining challenges for GAN image generation Additionally it explores three promising applications of GANs including image to image translation unsupervised domain adaptation and GANs for security This book appeals to students and researchers who are interested in GANs image generation and general machine learning and computer vision
