Developing Charging Infrastructure and Technologies for Electric Vehicles Alam, Mohammad Saad,Pillai, Reji Kumar,Murugesan, N.,2021-12-31 The increase in air pollution and vehicular emissions has led to the development of the renewable energy based generation and electrification of transportation. Further the electrification shift faces an enormous challenge due to limited driving range long charging time and high initial cost of deployment. Firstly there has been a discussion on renewable energy such as how wind power and solar power can be generated by wind turbines and photovoltaics respectively while these are intermittent in nature. The combination of these renewable energy resources with available power generation system will make electric vehicle EV charging sustainable and viable after the payback period. Recently there has also been a significant discussion focused on various EV charging types and the level of power for charging to minimize the charging time. By focusing on both sustainable and renewable energy as well as charging infrastructures and technologies the future for EV can be explored. Developing Charging Infrastructure and Technologies for Electric Vehicles reviews and discusses the state of the art in electric vehicle charging technologies their applications economic environmental and social impact and integration with renewable energy. This book captures the state of the art in electric vehicle charging infrastructure deployment their applications architectures and relevant technologies. In addition this book identifies potential research directions and technologies that facilitate insights on EV charging in various charging places such as smart home charging parking EV charging and charging stations. This book will be essential for power system architects mechanics electrical engineers practitioners developers practitioners researchers academicians and students interested in the problems and solutions to the state of the art status of electric vehicles
