As seen on Good Morning America and successfully adopted by thousands of subscribers, this easy-to-use system will help slash any household budget. Now more than ever, people are desperate to save money without scrimping on every little purchase or sacrificing their lifestyle. Like

most Americans stay at home moms Chrissy Pate and Kristin McKee spent the lion's share of their budgets on what they assumed to be static costs such as groceries and utilities. But when using traditional couponing and cheapskate guides didn't help their budgets shrink by a dime, Pate and McKee decided to come up with their own way to save. Within a few months their household expenses dropped by more than half from spending \$800 each per month to less than \$350. Only a few years after developing their centsable system, Pate and McKee have helped thousands of subscribers save money without spending hours finding and cutting coupons or giving up extras like travel and entertainment. In this prescriptive guide, these authors show how anyone can save thousands of dollars on cleaning supplies, pet care, toys, travel, and most importantly groceries without giving up healthy foods, favorite products, or the occasional splurge. **The Humachine** Nada R. Sanders, John D. Wood, 2024-03-11. Updated for a post-Covid world, the second edition of this groundbreaking book explains why becoming a Humachine enterprise is the only way forward for a company to maintain a competitive advantage in the age of artificial intelligence AI. The first edition of *The Humachine* offered a foundation for a new form of enterprise integrating AI technology and human resources to optimize the unique advantages possessed by each. Now in the face of the Great Resignation and botsourcing, where an activity previously done by humans is replaced by technology, thought leaders Sanders and Wood present a more positive and promising scenario where an enterprise recognizes human resources as an asset class that possesses skills that cannot be replaced by automation. Enlightened business leaders will look to create synergy between technology and people, enabling the organization to maximize its capabilities by elevating the basis of decision making with closer to perfect information and rationality. This book provides a roadmap for how to do this and achieve collective intelligence at the enterprise level superintelligence. More specifically, it answers these questions and more: Why must an enterprise achieve superintelligence as a competitive advantage in the age of AI? How can any organization achieve superintelligence by following the 4 I model? What is the step-by-step process an enterprise should follow in becoming a Humachine? What strategies can be used by enterprise leaders to futureproof the Humachine against uncertainty? All business leaders, executives, and managers at companies wanting to use AI and technology to survive and thrive in this new age and students of analytics and decision making will value this thought-provoking and practical book rich with case studies.
