Student Financial Literacy Dorothy B. Durband, Sonya L. Britt, 2012-04-04 College students are particularly vulnerable to making poor financial decisions. One method of addressing personal finances and financial stress among students of higher education is through university based financial education programs. Student Financial Literacy Program Development presents effective strategies to assist in the implementation or the enhancement of a program as a tool to improve students' educational experience and financial well being. It presents the key components of financial education programs designed to address the growing concerns associated with high levels of debt and low levels of financial literacy among college students. Student Financial Literacy Campus Based Program Development is packed with financial education and counseling information and guidance. It was very difficult to write this review as I wanted to share ALL the excellent direction this book provides. The editors and contributing authors have developed an excellent resource for not only those interested in developing or enhancing a campus based financial education program but also for anyone involved in financial education, counseling and planning.

Nicolini, 2019-01-23 Are people ready to take pivotal financial decisions like choosing a mortgage saving for retirement or investing their savings. How does the degree of knowledge about financial products and services affect the quality of their choices?

Can financial fraud be prevented by increasing consumer financial knowledge? Financial Literacy in Europe addresses these important questions and more. In the first part the author investigates the concept of financial literacy by analyzing its components and comparing different definitions from previous studies. This then forms a comprehensive measure of financial literacy to be applied in empirical studies that analyze the role of financial literacy in explaining consumers' financial behaviors.

In the second part of the study the author uses brand new data collected by the Consumer Finance Research Center CFRC from several European countries the UK Germany France Italy Sweden and Spain to assess financial literacy in Europe and highlight similarities and differences across countries. Filling an important gap in previous research the author

develops a rigorous approach in the measurement of financial literacy in order to examine European financial literacy issues in great detail. This book therefore is a useful resource for assessing the effectiveness of single financial education programs or planning national strategies on financial education. It can also support policy makers in developing financial regulation and consumer protection strategies considering the consumer perspective and their ability to deal with financial markets and
