

5. NEGOTIATING GUIDELINES AND TIPS

You don't get the deal you deserve, you get the deal you negotiate.

Negotiating a technology licensing agreement is the art of reaching an agreement where the licensor grants and the licensee acquires the right to use the licensor's technology on specified terms and conditions. The objective is to set the basis for a mutually satisfactory and ultimately rewarding future relationship. That is, a "win-win" outcome as opposed to a "win-lose" outcome (which, in effect, is a "lose-lose" outcome). To achieve such a "win-win" outcome both the potential licensor and licensee must be mindful of the fact that each party has something of value that they will be bringing to the relationship. Understanding what that value is and understanding the needs and expectations of both parties in entering into such an agreement is the key to a successful negotiation.³¹

THE PROCESS OF NEGOTIATING A LICENSE AGREEMENT

The negotiation process involves four distinct phases: preparing, discussing, proposing and bargaining.

The Preparation Phase

This is probably the most important, in that it is almost impossible to recover from, or overcome, inadequate preparation. Preparation includes all that has been discussed thus far in this Manual. That is, both the licensor and licensee would have determined by this stage that for one reason or another a license agreement is in keeping with their respective business objectives. They would have identified each other as likely partners having the potential to complement, strengthen and fulfill each other's business aspirations.
