## **Negotiating Corruption Governance Hybridity Interventions:**

**Negotiating Corruption** Laura Routley, 2015-12-14 Negotiating Corruption demands that we think again about corruption in Africa. It problematises the framing of African corruption as a phenomenon that emerges from a clash between two sets of norms. Moreover, it highlights the colonial legacies of this frame which situates African corruption within continually recurring debates about the political inclusion or banishment of others. NGOs are characterised as intermediaries between the local and the international and between the state and the population. In both of these roles they are understood to reform governance by bringing about changes in culture and instituting bureaucratic norms. They have therefore been seen as part of the apparatus of a global liberal governmentality. This book complicates this portrayal and highlights the ambiguous role of liberal governmentality through an exploration of the grey practices of the NGOs studied. These practices are grey as they do not fit the pattern of virtuous NGOs holding the state to account described in development policy yet at the same time they ensure that the state produces the outcomes that a fully functioning state ought to. This enacting of oppositional and antagonistic elements is further unpacked in conversation with Homi Bhabha's concepts of negotiation and hybridity. Negotiating Corruption draws attention to both the limitations of current explanations of corruption in Africa and the problematic way in which they are framed. The book's detailed engagement with understandings of corruption within policy and academic debates will make it a useful resource for undergraduate teaching. It will also be of keen interest to researchers, academics and postgraduate students who engage with the issues of corruption, NGOs, civil society, African politics, governmentality and hybridity.

**Lacan, Deleuze and World Politics** Andreja Zevnik, 2016-02-26 This book aims to re-think the way in which the subject is inscribed in the modern political and does so by exploring the potentiality of Lacan's Deleuzian theoretical framework. It concerns a different ontology and a non-dualist understanding of political and legal existence by focusing on questions such as how to think alternative notions of political existence and what kind of political, social and legal order do these come to create. This investigation into political appearance of subjects through concepts of law, body and life is led and influenced by the thought of Gilles Deleuze and Jacques Lacan as well as Alain Badiou, Antonio Negri and Slavoj Žižek. The book takes on various conceptualisations of life, explores the relationship between law and life and develops an alternative notion of legal and political existence in particular in the context of rights. On the back of Guantánamo's legal and political discourses, this work aims to show why and how the problems of world politics or the limitations of human rights discourse require an engagement with questions such as what it means to exist as a human being, what forms of life are politically recognised, which are not and why this distinction. By pointing to a different ontology for thinking and understanding global politics and demonstrating how a trans-disciplinary and philosophical approaches can foster the debates in world politics, this book will be of interest to postgraduates and scholars working on critical normative ideas in international politics, critical security studies and critical legal studies.

**Politics and Suicide** Nicholas

Michelsen, 2015-10-08 Politics and Suicide argues that whilst the historical lineage of suicidal politics is recognised the fundamental significance of autodestruction to the political remains under examined It contends that practices like suicide bombing do not simply embody a strange or abnormal suicidal articulation of the political but rather that the existence of suicidal politics tells us something fundamental about the political as such and thinking about political violence more broadly Recent world events have emphatically shown our need for tools with which to develop better understandings of the politics of suicide Through the exploration of several arresting case studies including the Kamikaze bombers of World War Two Jan Palach's self immolation in 1969 Cold War nuclear deterrence and the suicide terrorist attacks of 9 11 Michelsen asks how we might talk of a political suicide in any of these contexts The book charts how political processes go suicidal and asks how we might still consider them to be political in such a case It investigates how suicide can function as politics A strong contribution to the fields of philosophy and international relations theory this work will also be of interest to students and scholars of political theory and terrorism political violence

International Intervention Instruments against Corruption in Central America Laura Zamudio-González, 2020-04-01 This book analyzes the innovative international intervention instruments against corruption in Central America called Hybrid Anticorruption Agencies or HACAS The author aims to disclose and explain the decision of the United Nations and the Organization of American States to promote separately but with a similar rationale a new strategic approach to fighting corruption through the creation of two HACAS Specifically the book examines the International Commission Against Impunity in Guatemala CICIG and the Mission to Support the Fight against Corruption and Impunity in Honduras MACCIH The CICIG and the MACCIH represent unique cases of anti corruption hybrid commissions because they combine resources participants and or national and international institutions which in a coherent and integrated manner strengthen the investigation prosecution and punishment of corrupt and criminal acts The book also studies the HACAS as international instruments not free from risks and limitations

**Security Without Weapons** M. S. Wallace, 2016-09-13 Few questions of global politics are more pressing than how to respond to widespread violence against civilians Despite the efforts of Responsibility to Protect R2P proponents to draw attention away from exclusively military responses debates on humanitarian intervention and R2P's Third Pillar still tend to boil down to two unsatisfying options stand by and do nothing or take military action to protect civilians essentially using violence to stop violence Accordingly and given disagreement and uncertainty regarding moral claims as well as the unpredictability of military effectiveness this book asks how can we counter violence ethically and effectively taking action consistent with our particular moral commitments while also nurturing difference and enacting responsibility towards multiple others After evaluating the pragmatic and ethical failings of military action the book proposes nonviolent intervention as a third unarmed on the ground option for protecting civilians during humanitarian crises In the empirical section of the book focusing on the discursive and psychological conditions enabling violence Wallace analyses the mechanisms by which Nonviolent Peaceforce

an international NGO engaged in nonviolent intervention unarmed civilian peacekeeping UCP was able to protect civilians and prevent violence even if on a limited scale in the broader context of Sri Lanka's war counterinsurgency in 2008 Both philosophically innovative and practically useful to those working in the field the book contributes to a range of literatures and debates from just war theory and poststructuralist ethics to nonviolent action and conflict transformation and from humanitarian intervention R2P and civilian protection to strategic theory and discursive and psychological theories of violence

**Postcolonial Governmentalities** Terri-Anne Teo, Elisa Wynne-Hughes, 2020-02-18 This edited volume asks how governmentality and postcolonial approaches can be brought together to help us better understand specific sites and practices of contemporary postcolonial governance The framework approach was inspired by the recent use of governmentality approaches that emphasize how governance functions not solely through states but through multiple tactics and means that regulate the conduct of individuals and institutions through both freedom and constraint A postcolonial approach to governance exposes the role of postcolonial sites and practices in shaping governance and the inequalities embedded within it insofar as standards of conduct determine which subjects are privileged and excluded Postcolonial perspectives show how governance can be both productive and repressive functioning to impose a fixed code of conduct that objectifies gendered racialized sexualized others as part of its project of improvement In discussing governance we must also consider how power is negotiated and challenged through forms of resistance and counter conduct This volume argues that we need to incorporate postcolonial theories and carefully examine postcolonial practices and sites to understand how contemporary governance shapes various transnational inequalities and social divisions The authors in this edited volume illustrate the value of postcolonial governance as a conceptual framework through empirical examples from Asia Australia Africa and Europe These cases unpack practices of governance operating within complex political landscapes

**Hybridity: Law, Culture and Development** Nicolas Lemay-Hebert, Rosa Freedman, 2017-02-17 This book explores recent developments in the concept of hybridity through a multi disciplinary perspective bringing ideas about legal plurality together with the fields of peace development and cultural studies Analysing the concepts of hybridity and hybridization their history their application in law and legal studies and their implications for thinking and rethinking legal plurality the book shows how the concept of hybridity can contribute to an understanding of the processes that occur when different normative or legal orders or frameworks confront each other

**Clientelism and Patronage in the Middle East and North Africa** Laura Ruiz de Elvira, Christoph Schwarz, Irene Weipert-Fenner, 2018-07-17 One common demand in the 2011 uprisings in the MENA region was the call for freedom dignity and social justice Citizens rallied against corruption and clientelism which for many protesters were deeply linked to political tyranny This book takes the phenomenon of the 2011 uprisings as a point of departure for reassessing clientelism and patronage across the entire MENA region Using case studies covering Morocco Tunisia Egypt Jordan Lebanon Turkey and the Gulf monarchies it looks at how the relationships within and between

clientelist and patronage networks changed before 2011. The book assesses how these changes contributed to the destabilization of the established political and social order and how they affected less visible political processes. It then turns to look at how the political transformations since 2011 have in turn reconfigured these networks in terms of strategies and dynamics and concomitantly what implications this has had for the inclusion or exclusion of new actors. Are specific networks expanding or shrinking in the post 2011 contexts? Do these networks reproduce established forms of patron-client relations or do they translate into new modes and mechanisms? As the first book to systematically discuss clientelism, patronage and corruption against the background of the 2011 uprisings, it will be a valuable resource for students and scholars of Middle Eastern Studies. The book also addresses major debates in comparative politics and political sociology by offering networks of dependency as an interdisciplinary conceptual approach that can travel across place and time.

*The Impact of Foreign Interventions on Democracy and Human Rights* Ana Magdalena Figueroa, 2022-01-28. The Impact of Foreign Interventions on Democracy and Human Rights provides holistic studies exploring the relationship between military and economic interventions and the policies, methods, intentions and consequences of the various American, French and Chinese interventions in the case studies they present.

*Postcolonial Identities in Africa* Pnina Werbner, Terence Ranger, 1996-09

Making a break with conventional wisdom in post-colonial discourse, this book explores contemporary African identities in transition. The contributors look at the colonial legacy and how colonial identities are being reconstructed in the face of deepening social inequality across the continent.

*Sociological Abstracts* Leo P. Chall, 2004. CSA Sociological Abstracts abstracts and indexes the international literature in sociology and related disciplines in the social and behavioral sciences.

The database provides abstracts of journal articles and citations to book reviews drawn from over 1,800 serials publications and also provides abstracts of books, book chapters, dissertations and conference papers.

*Curbing Corruption* Bertram I. Spector, 2021-12-19. Many anti-corruption efforts have had only a minimal effect on curbing the problem of corruption. This book explains why that is and shows readers what works in the real world in the fight against corruption and why.

Counter-corruption initiatives often focus on the legal, institutional and contextual factors that facilitate corrupt behavior but these have had only nominal impacts because most of these reforms can be circumvented by government officials, powerful citizens and business people who are relentless in their quest for self-interest. This book argues that instead we should target the key individual and group drivers of corrupt behavior and through them promote sustainable behavioral change. Drawing on over 25 years of practical experience planning, designing and implementing anti-corruption programs in over 40 countries as well as a wealth of insights from social, psychological, ethical and negotiation research, this book identifies innovative tools that target these core human motivators of corruption with descriptions of pilot tests that show how they can work in practice. Anti-corruption is again becoming a priority issue, prompted by the emergence of more authoritarian regimes and the public scrutiny of government responses to the COVID-19 pandemic. Straddling theory and practice, this book is the perfect guide to

what works and what doesn't and will be valuable for policymakers NGOs development practitioners and corruption studies students and researchers     **Negotiating Peace and Confronting Corruption** Bertram Irwin Spector,2011 In Negotiating Peace and Confronting Corruption Bertram Spector argues that the peace negotiation table is the best place to lay the groundwork for good governance     **Detecting Corruption in Developing Countries** Bertram Irwin Spector,2012

Excessive government discretion bribery and abuse of power for private benefit are widespread phenomena in developing countries This corruption results in hundreds and thousands of citizens going without the critical public services they are entitled to or rely on Corruption occurs at all levels of society from local and national governments civil society judiciary functions and small and large businesses alike leaving little room for a country's development and economic growth To combat corruption in developing countries policy makers must understand the problem and devise a meaningful strategy that attacks its underlying causes and not just deals with its symptoms Detecting Corruption merges scholarship on corruption assessments with practical techniques on ways practitioners and policy makers can implement anticorruption assistance The authors argue that assessments need to adopt a comprehensive whole of government approach that examines all key sectors where there are corruption vulnerabilities Strong accountability control measures need to be designed and implemented across all sectors into a multidimensional strategy program Detailed case studies from the authors work in Ukraine Honduras Senegal and Timor Leste show the effectiveness of the comprehensive approach to corruption     *Anti-corruption Strategies in Fragile States* Jesper Johnsøn,2016 In a refreshing departure from existing literature on corruption Anti Corruption Strategies in Fragile States takes a public administration perspective studying the role of organisational factors in the success of organisational anti corruption strategies It is widely acknowledged that governance and anti corruption interventions play a crucial role in reducing fragility and building legitimate and resilient institutions Policy makers have re framed development goals for fragile states to achieve stability by addressing their special characteristics weak institutions and governance low capacity and legitimacy in government and vulnerability to violence This book shows how anti corruption and state building policies are often disconnected or incoherent and how executional challenges prevent strategies from translating into results Back cover
