## **Negotiating Strategically One Versus All:**

**Negotiating Strategically** A. Nikolopoulos, 2011-05-10 Negotiation is a key part of daily lives but learning how to negotiate successfully is a valuable skill. The author provides a tool kit for negotiation demonstrating new methods and giving practical advice *Strategic and Informational Barriers to Negotiation* Robert B. Wilson, 1993 *Bernard Brodie and the Foundations of American Nuclear Strategy* Barry Howard Steiner, 1991 Steiner analyzes how and why Brodie's understanding of weapons of unparalleled explosive force led him to posit the need for revolutionary strategic thinking in broadminded analytic method and in the focus upon cities as nuclear targets. He shows the tremendous effect Brodie's work had on the intellectual climate in which policy is determined particularly in his frequent combatting of conventional wisdom.

**Nixon's Vietnam War** Jeffrey P. Kimball, 1998 The signing of the Paris Agreement in 1973 ended not only America's Vietnam War but also Richard Nixon's best laid plans. After years of secret negotiations threats of massive bombing and secret diplomacy designed to shatter strained Communist alliances the president had to settle for a peace that fell far short of his original aims.

**Radical Critiques of the Law** Stephen M. Griffin, Robert C. L. Moffat, 1997 The past two decades have seen an outpouring of work in legal theory that is self consciously critical of aspects of American law and the institutions of the liberal state. In this lively volume eminent scholars in philosophy law and political science respond to this recent scholarship by exploring what constitutes a radical critique of the law examining such theories as critical legal studies feminist theory and theories of difference and critical race theory. The authors consider whether the critiques advanced in recent legal theory can truly be called radical and what form a radical critique of American law should take. Writing at the cutting edge of the critique of critical legal theory they offer insights first on critical legal scholarship then on feminist political and legal theory. A third group of contributions questions the radicalness of these approaches in light of their failure to challenge fundamental aspects of liberalism while a final section focuses on current issues of legal reform through critical views on criminal punishment including observations on rape and hate speech. Each major essay describes the underlying principles in the development of a radical legal theory and addresses unresolved questions relating to it while accompanying commentaries present conflicting views. The resulting dialogue explores wide ranging issues like equity value relativism adversarial and empathic legal advocacy communitarianism and the social contract impartiality and contingency natural law and corrective justice. A common thread for many of the articles is a focus on the social dimension of society and law which finds the individualism of prevailing liberal theories too limiting. Radical Critiques of the Law is particularly unique in presenting critical and feminist approaches in one volume along with skeptical commentary about just how radical some critiques really are. Proposing alternative critiques that embody considerably greater promise of being truly radical it offers provocative reading for both philosophers and legal scholars by showing that many claims to radicalism are highly problematic at best.
