Network Nation Revised Edition Human Communication Via Computer:

The Network Nation Starr Roxanne Hiltz, Murray Turoff, 1993 The defining document and standard reference for the field of computer mediated communication CMC *Bowling Alone: Revised and Updated* Robert D. Putnam, 2001-08-01 Once we bowled in leagues usually after work but no longer This seemingly small phenomenon symbolizes a significant social change that Robert Putnam has identified in this brilliant volume *Bowling Alone* which *The Economist* hailed as a prodigious achievement Drawing on vast new data that reveal Americans changing behavior Putnam shows how we have become increasingly disconnected from one another and how social structures whether they be PTA church or political parties have disintegrated Until the publication of this groundbreaking work no one had so deftly diagnosed the harm that these broken bonds have wreaked on our physical and civic health nor had anyone exalted their fundamental power in creating a society that is happy healthy and safe Like defining works from the past such as *The Lonely Crowd* and *The Affluent Society* and like the works of C Wright Mills and Betty Friedan Putnam's *Bowling Alone* has identified a central crisis at the heart of our society and suggests what we can do

HCI Remixed Thomas Erickson, David W. McDonald, 2007-12-21 Personal and reflective essays that describe how particular works whether papers books or demos from classics to forgotten gems have influenced each writer's approach to HCI Over almost three decades the field of human computer interaction HCI has produced a rich and varied literature Although the focus of attention today is naturally on new work older contributions that played a role in shaping the trajectory and character of the field have much to tell us The contributors to *HCI Remixed* were asked to reflect on a single work at least ten years old that influenced their approach to HCI The result is this collection of fifty one short engaging and idiosyncratic essays reflections on a range of works in a variety of forms that chart the emergence of a new field An article a demo a book any of these can solve a problem demonstrate the usefulness of a new method or prompt a shift in perspective *HCI Remixed* offers us glimpses of how this comes about The contributors consider such HCI classics as Sutherland's Sketchpad Englebart's demo of NLS and Fitts on Fitts Law and such forgotten gems as Pulfer's NRC Music Machine and Galloway and Rabinowitz's Hole in Space Others reflect on works somewhere in between classic and forgotten Kidd's *The Marks Are on the Knowledge Worker* King Beach's *Becoming a Bartender* and others Some contributors turn to works in neighboring disciplines Henry Dreyfuss's book on industrial design for example and some range farther afield to Lovelock's Gaia hypothesis and Jane Jacobs's *The Death and Life of Great American Cities* Taken together the essays offer an accessible lively and engaging introduction to HCI research that reflects the diversity of the field's beginnings
