**Computer and Information Science 2011** Roger Lee,2011-06-29 The series Studies in Computational Intelligence SCI publishes new developments and advances in the various areas of computational intelligence quickly and with a high quality The intent is to cover the theory applications and design methods of computational intelligence as embedded in the fields of

engineering computer science physics and life science as well as the methodologies behind them. The series contains monographs, lecture notes and edited volumes in computational intelligence spanning the areas of neural networks, connectionist systems, genetic algorithms, evolutionary computation, artificial intelligence, cellular automata, self-organizing systems, soft computing, fuzzy systems and hybrid intelligent systems. Critical to both contributors and readers are the short publication time and world-wide distribution; this permits a rapid and broad dissemination of research results. The purpose of the 10th IEEE ACIS International Conference on Computer and Information Science ICIS 2011 was held on May 16-18 2011 in Sanya, Hainan Island, China, is to bring together scientist, engineers, computer users, students to share their experiences and exchange new ideas and research results about all aspects theory, applications and tools of computer and information science and to discuss the practical challenges encountered along the way and the solutions adopted to solve them. The conference organizers selected the best 20 papers from those papers accepted for presentation at the conference in order to publish them in this volume. The papers were chosen based on review scores submitted by members of the program committee and underwent further rigorous rounds of review.
