Networks and Distributed Computation Michel Raynal, 1987 This book covers recent rapid developments in distributed systems It introduces the basic tools for the design and analysis of systems involving large scale concurrency with examples based on network systems considers problems of network systems considers problems of network and global state learning discusses protocols allowing synchronization constraints to be distributed and analyses the fundamental elements of distribution in detail using a large number of algorithms Interprocess communication and synchronization are central issues in the design of distributed systems taking on a different character from their counterparts in centralized systems **Parle '91 Parallel Architectures and Languages Europe** Emile H.L. Aarts, Jan van Leeuwen, Martin Rem, 2013-11-11 The innovative progress in the development of large and small scale parallel computing systems and their increasing availability have caused a sharp rise in interest in the scientific principles that underlie parallel computation and parallel programming The biannual Parallel Architectures and Languages Europe PARLE conferences aim at presenting current research material on all aspects of the theory design and application of parallel computing systems and parallel processing At the same time the goal of the PARLE conferences is to provide a forum for researchers and practitioners to exchange ideas on recent developments and trends in the field of parallel computing and parallel programming The first two conferences PARLE 87 and PARLE 89 have succeeded in meeting this goal and made PARLE a conference that is recognized worldwide in the field of parallel computation PARLE 91 again offers a wealth of high quality research material for the benefit of the scientific community Compared to its predecessors the scope of PARLE 91 has been broadened so as to cover the area of parallel algorithms and complexity in addition to the central themes of parallel architectures and languages The proceedings of the PARLE 91 conference contain the text of all contributed papers that were selected for the programme and of the invited papers by leading experts in the field *Computer Systems Science and Engineering*, 1988 **Implementations of Distributed Prolog** Peter Kacsuk, Michael Wise, 1992-08-11 Leading international contributors present papers pertaining to current approaches in the design and implementation of distributed logic languages that are a generation beyond standard Prolog all of them introducing ideas of distributed and parallel programming in an attempt to bring high performance features to logic programming applications Details all aspects of underlying research at a number of global centers including language implementation models and techniques hardware architecture performance results applications and more **Publishers Trade List Annual, 1992**, 1992 American Book Publishing Record, 2006 Books in Series, 1950 Vols for 1980 issued in three parts Series Authors and Titles **ABCL** Akinori Yonezawa, 1990 This book provides an overview of the new paradigm through the programming language ABCL **The Publishers' Trade List Annual**, 1995 *Books in Series, 1876-1949* R.R.
