

The background of the book cover is an abstract, glowing network of interconnected nodes and edges, resembling a complex web or a neural network. The nodes are small, bright circles, and the edges are thin, glowing lines. The overall color palette is dark blue and purple, with the network elements glowing in a light blue or cyan. The network structure is dense and fills the entire frame, creating a sense of depth and complexity.

Networks, 2009 In the last 20 years interest in network phenomena has grown immensely among anthropologists psychologists political scientists economists and lawyers Empirical observation shows that network arrangements can be found in many branches of business This is often linked to rapid changes in today's markets and technologies but it is not the only reason Legal institutions have been at the centre of private law since the industrial revolution but today contracts and corporations cannot cope with the risks and opportunities posed by networks Legal practice needs solutions which go beyond the classical traditions of thinking in the dichotomy of contract and corporation This volume is the outcome of a conference held in Fribourg Switzerland which focused on the legal treatment of contractual networks in particular questions of network expectations the fragility of network institutions and the question of how law can minimise network specific risks towards third parties The contributors among them many of the world's leading scholars in this field include Roger Brownsword Simon Deakin Gunther Teubner Hugh Collins and Marc Amstutz The book will be of interest to scholars of contract corporate law and legal theory

Complex Networks XV Federico Botta, Mariana Macedo, Hugo

Barbosa,Ronaldo Menezes,2024-04-13 The International Conference on Complex Networks CompleNet brings together researchers and practitioners from diverse disciplines working on areas related to complex networks CompleNet has been an active conference since 2009 Over the past two decades we have witnessed an exponential increase in the number of publications and research centres dedicated to this field of Complex Networks aka Network Science From biological systems to computer science from technical to informational networks and from economic to social systems complex networks are becoming pervasive for dozens of applications It is the interdisciplinary nature of complex networks that CompleNet aims to capture and celebrate The CompleNet conference is one of the most cherished events by scientists in our field Maybe it is because of its motivating format consisting of plenary sessions no parallel sessions or perhaps the reason is that it finds the perfect balance between young and senior participation a balance in the demographics of the presenters or perhaps it is just the quality of the work presented

Legal Protection of Genetic Resources and Traditional Knowledge from a Social Network Perspective Elnur Karimov,2025-12-09 This book explores the urgent and evolving legal challenges surrounding the use of genetic resources and traditional knowledge TK

particularly those held by Indigenous Peoples and local communities International frameworks like the Nagoya Protocol and the 2024 WIPO Treaty aim to regulate benefit sharing but legal enforcement remains weak This book argues that traditional legal approaches both international and national alone are no longer sufficient and proposes a network focused enforcement and compensation mechanism that uses social network analysis to examine the flow of genetic materials and TK through national and global supply chains This approach is applied to 30 real world biopiracy case studies across diverse regions including Asia Latin America and Africa to identify legal blind spots and power asymmetries The book explains how predicting central nodes within supply chains where biopiracy and misappropriation are most likely to occur can lead to better enforcement and compensation outcomes It then concludes with policy recommendations and suggestions to design more robust protection mechanisms for genetic resources and the associated TK This book will interest scholars of intellectual property and biotechnology law as well as scholars of indigenous studies Policymakers indigenous activists and social scientists who are interested in the broader applications of social network analysis will also find this of note
