Networks Institutions Emerging Cambridge Comparative:

Handbook on the Economics of the Internet Johannes M. Bauer, Michael Latzer, 2016-05-27 The Internet is connecting an increasing number of individuals organizations and devices into global networks of information flows It is accelerating the dynamics of innovation in the digital economy affecting the nature and intensity of competition and enabling private companies governments and the non profit sector to develop new business models In this new ecosystem many of the theoretical assumptions and historical observations upon which economics rests are altered and need critical reassessment

Inside Afghanistan Timor Sharan, 2022-09-28 This book maps out how political networks and centres of power engaged in patronage corruption and illegality effectively constituted the Afghan state often with the complicity of the U S led military intervention and the internationally directed statebuilding project It argues that politics and statehood in Afghanistan in particular in the last two decades including the ultimate collapse of the government in August 2021 are best understood in terms of the dynamics of internal political networks through which warlords and patronage networks came to capture and control key sectors within the state and economy including mining banking and illicit drugs as well as elections and political processes Networked politics emerged as the dominant mode of governance that further transformed and consolidated Afghanistan into a networked state with the state institutions and structures functioning as the principal marketplace for political networks bargains and rent seeking The fade of state survival and fragmented political order was a performative act and the book contends sustained through massive international military spending and development aid obscuring the reality of resource redistribution among key networked elites and their supporters Overall the book offers a way to explain what it was that the international community and the Afghan elites in power got so wrong that brought Afghanistan full circle and the Taliban back to power

Networks and Organizations Nitin Nohria, Robert G. Eccles, 1992 Networks Organizations debunks the myth that we are in the midst of an unprecedented era of change refocuses attention on the timeless problem of management mobilizing individual collective action The authors take a fresh look at what actually happens in organizations reveal how rhetoric the search for identity not structure systems strategies that characterize the design perspective of organizations are the real motivators of action in organizations They then offer an alternative view in which robust action not equilibrium fit alignment should serve as a positive guide for managerial action

European Corporate Governance Thomas Clarke, Jean-Francois Chanlat, 2009-06-24 In light of the most severe financial crisis since the 1930s this intelligent look at European corporate governance brings out the richness of European corporate governance systems and highlights historical weaknesses that will require further work for a sustainable corporate governance environment in the future
