**Extended Curriculum Programmes** Tennyson Mgutshini, 2022-04-30 The introduction of ECPs in South African Universities is seen by many as South Africa s key strategy for addressing the problem of poor patterns of student success and has its basis on the uncontested acceptance that an extended study duration may be necessary to bring some categories of learners to a level of parity with the readiness expectations of their course of study Even so this transformative strategic imperative has been plagued by a range of challenges that include poor systems readiness poor selection mechanisms in the identification of ECP students poor numeracy and literacy amongst students and indifferent teacher involvement in ECPs This volume offers a rare insight into many of the above recognised challenges and in so doing provides critical matter for thought for educators within the higher education sector

The text responds to a recent WHO mandate which seeks the input of nurses and midwives as part of an interprofessional team of key strategists for facilitating global health. The Lancet report is also an important document used throughout the text and an interview with Dr Julio Frenk, author of that report, is included. Social, political, cultural, economic, and environmental factors, including climate change, are integrated into determinants of global health. The text covers the foundations of global health, including the emerging concept of climate justice, the ethical context of global health, and the importance of interprofessional education. It addresses key issues of global health with a focus on poor and vulnerable individuals, particularly women and children, and those living in areas of conflict. In addition to describing notable accomplishments toward achieving global health, the book focuses on the need for increasing access to primary care, improving clinical practice through expanded education, and engaging interdisciplinary researchers in discovery of viable solutions. **Contingent Citizens** Elizabeth Hull, 2020-05-27. *Contingent Citizens* examines the ambiguous state of South Africa's public sector workers and the implications for contemporary understandings of citizenship. It takes us inside an ethnography of the professional ethic of nurses in a rural hospital in KwaZulu Natal, shaped by a deep history of mission medicine and changing forms of new public management. Liberal democratic principles of transparency, decentralization, and rights, though promising freedom from control, often generate fear and insecurity instead. But despite the pressures they face, Elizabeth Hull shows that nurses draw on a range of practices, from international migration to new religious movements, to assert new forms of citizenship. Focusing an anthropological lens on professionalism, Hull explores the major fault lines of South Africa's fragmented social landscape: class, gender, race, and religion, to make an important contribution to the study of class formation and citizenship. This prize-winning monograph will be of interest to scholars of anthropology, development studies, sociology, and global public health.
