The Routledge Companion to Marine and Maritime Worlds 1400-1800 Claire Jowitt,Craig Lambert,Steve Mentz,2020-05-21 This book has been nominated for The Mountbatten Award for Best Book in the Maritime Media Awards 2021 The Routledge Companion to Marine and Maritime Worlds 1400 1800 explores early modern maritime history culture and the current state of the research and approaches taken by experts in the field Ranging from cartography to poetry and decorative design to naval warfare the book shows how once traditional and often Euro chauvinistic depictions of oceanic mastery during the early modern period have been replaced by newer global ideas This comprehensive volume challenges underlying assumptions by balancing its assessment of the consequences and accomplishments of European navigators in the era of Columbus da Gama and Magellan with an awareness of the sophistication and maritime expertise in Asia the Arab world and the Americas By imparting riveting new stories and global perceptions of maritime history and culture the contributors provide readers with fresh insights concerning early modern entanglements between humans and the vast unpredictable ocean With maritime studies growing and the ocean s health in decline this volume is essential reading for academics and students interested in the historicization of the ocean and the ways early modern cultures both conceptualized and utilized seas

The Atlantic Leonard Outhwaite,1959 The Liberty to Take Fish Thomas Blake Earle,2023-08-15 In The Liberty to Take Fish Thomas Blake Earle offers an incisive and nuanced history of the long American Revolution describing how aspirations to political freedom coupled with the economic imperatives of commercial fishing roiled relations between the young United States and powerful Great Britain The American Revolution left the United States with the liberty to take fish from the waters of the North Atlantic Indispensable to the economic health of the new nation the cod fisheries of the Grand Banks the Bay of Fundy and the Gulf of St Lawrence quickly became symbols of American independence in an Atlantic world dominated by Great Britain The fisheries issue was a near constant concern in American statecraft that impinged upon everything from Anglo American

relations to the operation of American federalism and even to the nature of the marine environment Earle explores the relationship between the fisheries and the state through the Civil War era when closer ties between the United States and Great Britain finally surpassed the contentious interests of the fishing industry on the nation's agenda. *The Liberty to Take Fish* is a rich story that moves from the staterooms of Washington and London to the decks of fishing schooners and into the Atlantic itself to understand how ordinary fishermen and the fish they pursued shaped and were in turn shaped by those far off political and economic forces. Earle returns fishing to its once central place in American history and shows that the nation of the nineteenth century was indeed a maritime one. *The Book of the Ocean* Ernest Ingersoll, 2021-11-22. The book *The Book of the Ocean* has been considered important throughout the human history and so that this work is never forgotten we have made efforts in its preservation by republishing this book in a modern format for present and future generations. This whole book has been reformatted, retyped and designed. These books are not made of scanned copies and hence the text is clear and readable. *One Hundred and Sixty Minutes* William Elliott Hazelgrove, 2021-09-01. One hundred and sixty minutes. That is all the time rescuers would have before the largest ship in the world slipped beneath the icy Atlantic. There was amazing heroism and astounding incompetence against the backdrop of the most advanced ship in history sinking by inches with luminaries from all over the world. It is a story of a network of wireless operators on land and sea who desperately sent messages back and forth across the dark frozen North Atlantic to mount a rescue mission. More than twenty-eight ships would be involved in the rescue of Titanic survivors along with four different countries. At the heart of the rescue are two young Marconi operators, Jack Phillips (25) and Harold Bride (22) tapping furiously and sending electromagnetic waves into the black night as the room they sat in slanted toward the icy depths and not stopping until the bone numbing water was around their ankles. Then they plunged into the water after coordinating the largest rescue operation the maritime world had ever seen and thereby saving 710 people by their efforts. The race to save the largest ship in the world from certain death would reveal both heroes and villains. It would begin at 11:40 PM on April 14 when the iceberg was struck and would end at 2:20 AM April 15 when her lights blinked out and left 1500 people thrashing in 25 degree water. Although the race to save Titanic survivors would stretch on beyond this, most people in the water would die but the amazing thing is that of the 2229 people, 710 did not and this was the success of the Titanic rescue effort. We see the Titanic as a great tragedy but a third of the people were rescued and the only reason every man, woman, and child did not succumb to the cold depths is due to Jack Phillips and Harold McBride in an insulated telegraph room known as the Silent Room. These two men tapping out CQD and SOS distress codes while the ship took on water at the rate of 400 tons per minute from a three hundred foot gash would inaugurate the most extensive rescue operation in maritime history using the cutting edge technology of the time wireless.

The Ship of Dreams Gareth Russell, 2020-11-03. This original and meticulously researched retelling of history's most infamous voyage. Denise Kiernan, New York Times bestselling author, uses the sinking of the Titanic as a prism through which

to examine the end of the Edwardian era and the seismic shift modernity brought to the Western world. While there are many Titanic books this is one readers will consider a favorite. Voyage In April 1912 six notable people were among those privileged to experience the height of luxury first class passage on the ship of dreams the RMS Titanic Lucy Leslie Countess of Rothes son of the British Empire Tommy Andrews American captain of industry John Thayer and his son Jack Jewish American immigrant Ida Straus and American model and movie star Dorothy Gibson Within a week of setting sail they were all caught up in the horrifying disaster of the Titanic's sinking one of the biggest news stories of the century Today we can see their stories and the Titanic's voyage as the beginning of the end of the established hierarchy of the Edwardian era. Writing in his signature elegant prose and using previously unpublished sources deck plans journal entries and surviving artifacts Gareth Russell peers through the portholes of these first class travelers to immerse us in a time of unprecedented change in British and American history. Through their intertwining lives he examines social technological political and economic forces such as the nuances of the British class system the explosion of competition in the shipping trade the birth of the movie industry the Irish Home Rule Crisis and the Jewish American immigrant experience while also recounting their intimate stories of bravery tragedy and selflessness. Lavishly illustrated with color and black and white photographs this is a beautiful requiem. The Wall Street Journal in which readers get the story of this particular floating Tower of Babel in riveting detail and with all the wider context they could want. Christian Science Monitor

Radar and the Raft Jeff Lantos, 2024-09-24 This science history nonfiction adventure mash up will be on every middle grade reader's radar. Who knew that an improbable rescue during WWII would be facilitated by scientific discoveries in the 18th century. Expert researcher and educator Jeff Lantos makes the history science connection between batteries and radar and one oceanic adventure in this engaging middle grade escapade told in two intertwining storylines. Readers are first invited to follow scientific discoveries in the 1700s that eventually lead to the creation of radar and are then immersed in a world where World War II rages German U boats sink ships and the ship just hit has an American mom and her two young kids aboard. Now Ethel Robert and Mary Bell are on a raft with fourteen other people floating in the ocean and hoping for rescue. Lantos expertly weaves radar's story of discovery with the Bell family's harrowing journey bringing readers on an exciting fast paced adventure through history. A rare and exhilarating mix of hard science and seagoing terror. Kirkus Reviews starred review

Oceans in World History Rainer F. Buschmann, 2011-05-09 **Liberty's War** Herman E. Melton, 2017-08-15 In the dark days of World War II merchant mariners made heroic contributions to the eventual Allied victory and suffered tremendous casualties in so doing. Among these were the engineers who toiled deep in the bowels of the ship and suffered appalling casualties. After the war engineering personnel were unlikely to talk about their experiences let alone write them down. These modest and self effacing men were more comfortable in a world of turbines and pistons so they seldom brought their stories forward. Liberty's War sets out to explore the experiences of one such engineer Herman Melton from his time as a cadet at

the U S Merchant Marine Academy through his experiences at sea as a third assistant engineer Melton s story is representative of the thousands of Merchant Marine engineers who served on board Liberty ships during the war Like many young Americans he sought to do his part and in 1942 he obtained an appointment to the newly created U S Merchant Marine Academy at Kings Point New York After graduating from the academy in 1944 he shipped out to the Pacific Theatre surviving the sinking of his Liberty ship the SS Antoine Saugrain and its top secret cargo

The Sinking of the Laconia and the U-Boat War James P. Duffy,2009-05-14 In early 1942 the Cunard luxury liner Laconia had been converted into a troopship On September 12 1942 she was hit by two torpedoes fired by the German U boat U 156 This title presents the story of the sinking of the British Liner Laconia by the dreaded U Boat 156 a vessel crowded with 1800 Italian POWs and 103 Polish soldiers
