Oceans And Society Blue Planet:

Oceans and Society Samy Djavidnia, Michael Ott, Sophie Seeyave, Victoria Cheung, 2014-06-02 Oceans and Society Blue Planet www.oceansandsociety.org is a global initiative bringing together many ocean observing programmes with a societal benefit focus. It was created in 2011 as a Task within the Work Plan of the Group on Earth Observations GEO. The Geneva-based GEO is a voluntary partnership of some 90 governments and 77 intergovernmental international and regional organisations. It is committed to integrating global observations through strengthened cooperation and coordination among global observing systems and research programmes. Blue Planet held its inaugural Symposium in Ilhabela, Brazil, in November 2012. Participants from some 25 countries representing a diverse array of international programmes presented and discussed issues including the coordination of and information access from global ocean observing systems for open ocean coastal and inland ecosystems, operational ocean forecasting, applications of observations for sustainable fishery and aquaculture, and capacity building. A major outcome of the Symposium was the production of this book. The contributions to the Symposium served as a starting point and were developed to provide a comprehensive overview of the scope and breadth of the Oceans and Society Blue Planet initiative. Targeted at all stakeholders within the ocean and marine community, this volume discusses current activities and future actions and raises awareness for the further development and implementation of the Blue Planet agenda. Readers will learn more about ocean observations, how they can be integrated, and their applications to benefit society as a whole.

Oceans Gregory S. Stone, 2011 Part of CEMEX Conservation Book Series. This title looks at the many ways in which all life on Earth depends on a healthy ocean and analyzes the many threats facing its integrity and the welfare of the thousands of people and species that live in and near marine environments.

Blue Planet, Blue God Meric Srokosz, Rebecca Watson, 2017-11-30 The ocean dominates the surface of the earth and is in the pages of the Bible too. The Bible offers a view of the sea and the life it supports which affirms its intrinsic value to God as a good and indeed essential part of creation. At the same time it also speaks perceptively of the sea's vulnerability to damage and change. The Bible's focus on the sea raises questions about economics and the interconnectedness of communities whilst further references to the sea raise questions about our human-centredness and spirituality and about our fear of chaos and disaster. In a unique collaborative project the oceanographer Meric Srokosz and the biblical scholar Rebecca Watson not only offer environmental insights on the sea but also connect the ocean with other key issues of broader concern: spirituality, economics, chaos, and our place in the world. Each chapter concludes with ideas for discussion and reflection and for suggested actions in the light of the issues raised. The book will present a fresh new lens through which to view the Bible and as such inform biblical scholars, students, and preachers alike.
