## Uber Top Returns:

*Behavioral Finance: The Second Generation* Meir Statman, 2019-12-02 Behavioral finance presented in this book is the second generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted the standard finance notion of people's wants as rational wants restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as irrational, succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits: utilitarian, expressive, and emotional. It distinguishes normal wants from errors and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children, and families gaining high social status and staying true to values. People's normal wants even more than their cognitive and emotional shortcuts and errors underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency. *Fragen über*
