Next-Generation Green Energy Technologies for Sustainable Development Surender Reddy Salkuti, 2025-10-31 This book aims to find solutions to various issues starting from integration and control of next generation grids hybrid power generation electric vehicles energy storage forecasting wide area monitoring electrical markets communication coordinated control and protection empowering the customer with tools for optimizing their energy consumption and security for the effective reliable and risk free operation of the power networks There is a requirement to conduct a comprehensive analysis of the integration of a large number of EVs and their impact on various sectors of society This book also discusses the applications of advanced power electronics intelligent control techniques effective energy management EV charging networks the impact of EV load on distribution systems economic analysis and power markets advanced flexibility strategies for smart grids recent advances in energy storage and research directions emerging fields such as artificial intelligence internet of things and machine learning Several developments in green energy technologies have gained momentum in recent years This book considers the nuances of new paradigms including green energy technologies smart grid components the impact of energy storage electric vehicles and distributed energy resources in the power networks It provides illustrative and comprehensive strategies to furnish pragmatic solutions to multifaceted challenges ushering in a new era of heightened efficiency unwavering reliability and enhanced overall performance in modern smart and hybrid energy systems Wireless Algorithms, Systems, and Applications Dongxiao Yu, Falko Dressler, Jiguo Yu, 2020-09-09 The two volume set LNCS 12385 12386 constitutes the proceedings of the 15th International Conference on Wireless Algorithms Systems and Applications WASA 2020 which was held during September 13 15 2020 The conference was planned to take place in Qingdao China due to the COVID 19 pandemic it was held virtually The 67 full and 14 short papers presented in these proceedings were carefully reviewed and selected from 216 submissions These submissions cover many hot research topics including machine learning algorithms for wireless systems and applications Internet of Things IoTs and related wireless solutions wireless networking for cyber physical systems CPSs security and privacy solutions for wireless applications blockchain solutions for mobile applications mobile edge computing wireless sensor networks distributed and localized algorithm design and analysis wireless crowdsourcing mobile cloud computing vehicular networks wireless solutions for smart cities wireless algorithms for smart grids mobile social networks mobile system security storage systems for mobile applications etc *Smart Robust Operation and Trading of Integrated Energy Systems with Low Pollution Goals* Kaiping Qu, Yue Zhou, Xin Fang, Shuli Wen, Shiwei Xie, 2024-09-23 To mitigate two major environmental concerns of global warming and air pollution renewable energies with uncertainty are increasingly deployed in power systems which challenge the system's secure operation A single system usually has limited adjusting ability In contrast integrated energy systems such as electricity gas electricity traffic electricity heat and transmission distribution coordinated systems enhance the regulating ability of renewable energy

accommodation and environmental protection The operation of integrated energy systems will meet three essential requirements low pollution attribute robustness and cooperativity However the diversity of uncertainty conditions the complementarity of new energy accommodation among systems the conflict of interest between systems and the dispatch autonomy of systems challenge the requirements mentioned above The main goal of this Research Topic includes 1 Propose more effective trading mechanisms or control strategies for carbon and air pollutant emissions 2 Fully use complementary effects between electric power natural gas heat hydrogen and traffic systems 3 Realize the coordinated operation of integrated energy systems with limited information interaction and ensured dispatch autonomy 4 Improve the robustness of integrated energy systems under diversified uncertainty conditions 5 Apply data based reinforcement learning methods for the dynamic decision of smart integrated energy systems under complex environments Electric Transportation Systems in Smart Power Grids Hassan Haes Alhelou, Ali Moradi Amani, Samaneh Sadat Sajjadi, Mahdi Jalili, 2023-02-15

The leading countries around the globe including Australia have taken serious steps to decarbonize their energy and transportation sectors as part of their obligations for a suitable future with fewer emissions and a better environment The decarbonization plans in different countries have resulted in changes such as increases in the penetration level of renewable energy sources and the introduction of electric vehicles as a target for future transportation systems This is the point where mobility meets electricity and brings new challenges and opportunities especially in the integration with modern power systems The main impact would be on the demand side and the distribution network These impacts would be also reflected in the operation control security and stability of transmission systems This creates a new grid architecture characterized by a growing variability and uncertainties Moreover the growth in the share of renewable energy in the total energy market is one of the major causes of the increasing fluctuations in the balance between generation and consumption in the whole system Therefore the key challenge lies in developing new concepts to ensure the effective integration of distributed energy resources and electric transportation systems including EVs into existing and future market structures Electric Transportation Systems in Smart Power Grids address how these issues EVs E buses and other smart appliances on the demand side can be aggregated to form virtual power plants which are considered an efficient solution to provide operational flexibility to the grid The book also discusses how EV based virtual power plants can also provide myriad services for distribution system operators transmission system operators and even local prosumers within the energy community Features Describes the services required to power systems from EVs and electric transportation sector Covers frequency control in modern power systems using aggregated EVs Discusses the integration and interaction between EVs and Smart grids Introduces electric vehicle aggregation methods for supporting power systems Highlights flexibility provided from electric transportation system to smart energy sector Discusses the high penetration level of renewable energy sources and EVs *Electrical World* ,1924 **The Electrical World** ,1898 **Web and Big Data** Wenjie Zhang, Anthony

Tung,Zhonglong Zheng,Zhengyi Yang,Xiaoyang Wang,Hongjie Guo,2024-08-27 The five volume set LNCS 14961 14962 14963 14964 and 14965 constitutes the refereed proceedings of the 8th International Joint Conference on Web and Big Data APWeb WAIM 2024 held in Jinhua China during August 30 September 1 2024 The 171 full papers presented in these proceedings were carefully reviewed and selected from 558 submissions The papers are organized in the following topical sections Part I Natural language processing Generative AI and LLM Computer Vision and Recommender System Part II Recommender System Knowledge Graph and Spatial and Temporal Data Part III Spatial and Temporal Data Graph Neural Network Graph Mining and Database System and Query Optimization Part IV Database System and Query Optimization Federated and Privacy Preserving Learning Network Blockchain and Edge computing Anomaly Detection and Security Part V Anomaly Detection and Security Information Retrieval Machine Learning Demonstration Paper and Industry Paper **Deep Learning in Data Analytics** Debi Prasanna Acharjya,Anirban Mitra,Noor Zaman,2021-08-11 This book comprises theoretical foundations to deep learning machine learning and computing system deep learning algorithms and various deep learning applications The book discusses significant issues relating to deep learning in data analytics Further in depth reading can be done from the detailed bibliography presented at the end of each chapter Besides this book s material includes concepts algorithms figures graphs and tables in guiding researchers through deep learning in data science and its applications for society Deep learning approaches prevent loss of information and hence enhance the performance of data analysis and learning techniques It brings up many research issues in the industry and research community to capture and access data effectively The book provides the conceptual basis of deep learning required to achieve in depth knowledge in computer and data science It has been done to make the book more flexible and to stimulate further interest in topics All these help researchers motivate towards learning and implementing the concepts in real life applications Electric Vehicle Progress ,1999 The Electrical World and Engineer ,1899 **The World's Worst Bet** David J Lynch,2025-09-09 A singularly thrillingly persuasive chronicle of globalization s spectacular rise and fall Evan Osnos National Book Award winning author of Age of Ambition The triumphant globalization that began in the 1990s has given way to a world riven by conflict populism and economic nationalism In The World s Worst Bet David J Lynch offers a trenchant fast paced narrative of the rise and fall of the greatest engine of prosperity the world has ever known Lynch explains what went right what went wrong and what needs to change to preserve the benefits of global integration and to build prosperity for all Americans Lynch brings a deep understanding of the forces affecting Americans lives to his portrayal of a fascinating cast of characters presidents and policymakers factory workers whose anger over lost jobs reshaped a nation s politics and the anti globalization warriors of the right and left Their stories show how the United States made a bad bet on globalization gambling that it could enjoy its benefits while ignoring its costs dislocated workers vulnerable supply chains and the rise of a powerful rival With trillions of dollars now at stake The World s Worst Bet explains the failings of the past and offers an
