Contract Law and International Trade Regulation Pierre de Gioia Carabellese,Camilla Della Giustina,2025-12-15 Contract law and international trade are two significant and distinct areas of legal practice that often intersect. While rooted in the standard contract law syllabus this comprehensive advanced textbook seeks to examine the interaction between contract law rules and international trade regulation. It blends in depth discussion of the most important traditional legal concepts in both these areas of the law with a careful analysis of emerging issues and more contemporary topics such as digital contracting, trade in services and the Europeanisation of contract law at the level of the European Union. Facilitating engagement with the subject matter in a way that bridges foundational legal principles and contemporary debates the authors provide a rigorous intellectual analysis of the law where both precedents and applicable legislation are discussed critically. A comparative analysis is offered between English common law which is used as the constant yardstick and its EU counterpart. Focusing on key themes such as globalisation, IT and digitalisation, ESG and sustainability, the Covid 19 pandemic, Brexit and human rights this book allows readers to deepen their knowledge and understanding of contract law and international trade regulation while developing an appreciation of the contemporary relevance of these areas of the law and their challenges. Contract Law and International Trade Regulation will be a valuable text for advanced undergraduate and postgraduate law students.

The Future of Unions and Worker Representation Anthony Forsyth,2022-01-13 This book charts the path to revitalisation for trade unions in Australia, the USA, the UK and Italy. It examines the examples of innovation and digital campaigning that are enabling unions to build new forms of worker power and overcome decades of declining membership wrought by neoliberalism, globalisation and hostility from employers and the state. The study evaluates the responses of unions in each country to falling membership levels since the 1980s. It considers the US organising model and its adoption in Australia and the UK, comparing this with the strategies of Italian unions which have been more deliberately focused on precarious and migrant workers. The increasing reliance of US unions on community alliances as seen in the Fight for 15 and similar campaigns is scrutinised along with new union prototypes like Hospo Voice in Australia, the

Independent Workers Union of Great Britain and SI Cobas in Italy The book includes an in depth analysis of union responses to the gig economy in the four countries and the emergence of self organised worker collectives to combat this exploitative business model The vital role played by unions in defending the interests of workers during the COVID 19 pandemic is also examined As well as highlighting the most successful union initiatives to meet the challenges of the past 30 years the book assesses the strengths and deficiencies of the legal framework for union representation in the four nations It identifies the labour law reforms needed to rebuild collectivism but argues that more is needed than favourable laws This cross national study provides a rich basis for identifying the combination of reforms strategies and linkages required to ensure that unions can remain relevant for a new generation of digitally active workers
