## Airpods 2025:

Toward a Generative AI Turn in Translation and Interpreting Studies Łukasz Bogucki, 2026-01-01 This book traces developments in the automation of translation and interpreting processes from a theoretical angle. The author argues that the impact of Generative Artificial Intelligence on the language industry is so profound that a new turn in translation and interpreting theory is imminent. This paradigmatic shift, labelled the GenAI turn, goes beyond the mere technological advancement of computer-assisted translation and requires a reassessment of agency in particular the role of the human in translation and interpreting. A succinct discussion of turns in translation and interpreting studies, machine translation, translation technology, ethics, data privacy, large language models, and the human in the loop concept culminates in coining the term 'humane translation' to highlight the human dimension of the increasingly artificial and automated translation practice. This book will be of interest to anyone curious about exploring the potential of AI in the language industry, including researchers and practitioners in the field of Translation Studies.

Todas las tecnologías actuales de los misiles a los microondas de los smartphones a los coches funcionan con semiconductores. Hasta hace poco Estados Unidos era el principal productor de semiconductores lo que le permitió mantener su liderazgo como primera superpotencia mundial. Sin embargo su posición dominante se ve cada vez más amenazada por competidores de Taiwán Corea Europa y sobre todo China que inyecta anualmente miles de millones en un programa de fabricación de procesadores con el fin de alcanzar a su competidor estadounidense. No solo está en juego la prosperidad económica de Estados Unidos sino también su superioridad militar. Chris Miller muestra cómo los microprocesadores han revolucionado el mundo y cambiado el curso de la Historia y cómo la lucha por esta tecnología podrá conducir no solo a su escasez mundial sino también al nacimiento de una nueva Guerra Fría con una superpotencia hostil desesperada por cubrir la brecha que la separa de su rival.
