**Essays on Household Sorting and Valuation on Housing Amenities** Fernando Vendramel Ferreira,2004

Educational Policy Evaluation through International Comparative Assessments Rolf Strietholt,Wilfried Bos,Jan-Eric Gustafsson,Monica Rosén,2014 One of the most salient findings from the field of education is that there are huge national differences in student achievement as shown in international comparative studies like PISA and TIMSS The shockingly large gap between the highest performing countries mostly in East Asia and many European countries corresponds to a difference in attainment of two years of schooling Although this finding has been replicated in several studies the reasons for and consequences of such differences are currently not well understood This book is a collection of essays and studies by leading experts in international comparative education who demonstrate how international comparative assessments can be used to evaluate educational policies The volume is organized into two parts that address first theoretical foundations and methodological developments in the field of international assessments and second innovative substantive studies that utilize international data for policy evaluation studies The intention of this book is to revisit the idea of using the world as an educational laboratory both to inform policy and to facilitate theory development

**Erosion of the Property Tax Base**

Nancy Y. Augustine,2009 Increased reliance on residential property to generate tax revenue and soaring property values in many parts of the country have placed pressure on local officials to respond to concerns about higher property taxes The result has been erosion of the property tax base through a variety of policies designed to relieve residential property tax burdens through exemptions or abatements The chapters in this book provide analyses of recent property tax trends examine several responses to the increasing importance of residential property estimate the extent of property tax base erosion and its effects and consider other related topics The erosion of the property tax base raises serious concerns about the future health of our federal system of government and the continued ability of local governments to protect what de Tocqueville called America s passion for popular sovereignty This book is a result of the ongoing collaboration between the Lincoln Institute of Land Policy and the George Washington Institute of Public Policy presents the findings from the 2007 inaugural Property Tax Roundtable

*Public Finance in Theory and Practice Second edition* Holley Ulbrich,2013-03-01 The events of the last decade have challenged the contemporary neo classical synthesis in all branches of economics but particularly public finance The most notable feature of the 2nd edition of Public Finance in Theory and Practice is the infusion of behavioral

economics throughout the text with an end of chapter question inviting the student to apply a behavioral lens to some question or issue There continues to be an emphasis on the importance of the institutional context drawing on examples from many countries and emphasizing the role of lower level governments in a federal system The first five chapters establish this context by reviewing the role of government in a market system the description of government structure from an economic perspective the basic data about revenue and expenditures the elements of public choice and the distributional role of government The book has been substantially reorganized to put more emphasis on public expenditure Expanded treatment of public goods includes common property resources and congestible or club goods Expanded discussion of budgeting and cost benefit analysis provides some practical application of the theory Updated discussions of social security public education and health care address these three major contemporary public finance issues The traditional emphasis on revenue taxes fees and grants has been retained but follows rather than precedes the discussion of expenditures *Microeconomics* Thomas J.
