## **Negation Text Worlds And Discourse Advances In Discourse Processes:**

*Negation, Text Worlds, and Discourse* Laura Hidalgo-Downing, 2000-05 This work originates from the need to develop an integrated dynamic model of negation in discourse that is adequate for understanding the role of negation in an extensive and complex piece of discourse Most work on negation is strongly influenced by traditional philosophical problems but little work has been carried out in the area of discourse Approaches to negation within the functional cognitive tradition tend to focus on specific agents of negation its function as a speech act or its cognitive model Few attempts have been made to propose an integrated discourse model studies of negation with few exceptions tend to be limited to brief selections or isolated sentences This book fills the gap in studies of negation in discourse by providing an up to date critical review of the state of the art in negation and by proposing a model that brings together the semantic cognitive and pragmatic features of negation which are crucial for an understanding of its role in discourse

**World Building in Spanish and English Spoken Narratives** Jane Lugea, 2017-12-28 Text World Theory is a powerful framework for discourse analysis that thus far has only been used in monolingual Anglophone stylistic analyses This work adapts Text World Theory for the analysis of

Spanish discourse and in doing so suggests some improvements to the way in which it deals with discourse in particular with direct speech and conditional expressions Furthermore it applies Text World Theory in a novel way searching not for style in language but for the style of a language Focusing principally on deixis and modality the author examines whether Spanish speakers and English speakers construct the narrative text world in any patterned ways To do so the frog story methodology is employed eliciting spoken narratives from native adult speakers of both languages by means of a children s picture book These narratives are transcribed and subjected to a qualitative text world analysis which is supported with a quantitative corpus analysis The results reveal contrasts in Spanish and English speakers use of modality and deixis in building the same narrative text world and are relevant to scholars working in language typology cross cultural pragmatics and translation studies These novel applications of the Text World Theory push the boundaries of stylistics in new directions broadening the focus from monolingual texts to languages at large
