Neither Sun Nor Death:

Neither Sun nor Death Peter Sloterdijk, 2011-03-11 A series of dialogues with the most exciting and controversial German philosopher writing today Peter Sloterdijk first became known in this country for his late 1980s Critique of Cynical Reason which confronted headlong the enlightened false consciousness of Habermasian critical theory Two decades later after spending seven years in India studying Eastern philosophy he is now attracting renewed interest for his writings on politics and globalization and for his magnum opus Spheres a three volume archaeology of the human attempt to dwell within spaces from womb to globe Bubbles 1998 Globes 1999 Foam 2004 all forthcoming from Semiotext e In Neither Sun nor Death Sloterdijk answers questions posed by German writer Hans J rgen Heinrichs commenting on such issues as technological mutation development media communication technologies and his own intellectual itinerary Iconoclastic and provocative alternatively sparkling and bombastic a child of 68 and a libertarian Sloterdijk is the most exciting and controversial German philosopher to appear on the world scene since Nietzsche and Heidegger Like Nietzsche Sloterdijk remains convinced that contemporary philosophers have to think dangerously and let themselves be kidnapped by contemporary hypercomplexities they must forsake our present humanist and nationalist world for a wider horizon at once ecological and global Neither Sun nor Death is the best introduction available to Sloterdijk s philosophical theory of globalization It reveals a philosophe extraordinaire encyclopedic and provocative as much at ease with current French Theory Gilles Deleuze Paul Virilio Gabriel Tarde as with Heidegger and Indian mystic Osho Rajneesh *Between Faith and Belief* Joeri Schrijvers, 2016-05-01 What is to be done at the end of metaphysics Joeri Schrijvers s contemporary philosophy of religion takes up this question originally posed by Reiner Sch rmann and central to continental philosophy The book navigates the work of thinkers who have addressed such metaphysical concerns including Martin Heidegger Emmanuel Levinas Jean Luc Nancy Jean Luc Marion Peter Sloterdijk Ludwig Binswanger Jacques Derrida and more recently John D Caputo Mary Jane Rubenstein and Martin H gglund Notably Schrijvers engages both those who would deconstruct Christianity and those who remain within this tradition offering an option that is between between Christianity and atheism between progressive and conservative between faith and belief Ultimately Schrijvers confronts the end of metaphysics with a phenomenology of love and community arguing for the radical primacy of togetherness **The Wheel of Death** Philip Kapleau, 2013-05-13 Originally published in 1972 this anthology examines death through the eyes of great Buddhist Taoist Hindu and Western masters Instructions and specific rites are set forth to enable people to guide the mind of the dying through death and the Intermediate stage which follows The sections of Rebirth and Karma deal succinctly with these complex and often mis understood doctrines Photographing Ambiguity Ted Hiebert, 2025-05-02 Photographing Ambiguity examines photography as a metaphor for technological culture arguing that a relational exploration of the medium can shed light on the dominant ideological tendencies of our time The book advocates for photographic practices that emphasize

ambiguity suggesting that this approach fosters more conscientious ecological and creative relationships within the technological ecosystem of contemporary life Ted Hiebert critiques the notion that images should primarily serve to verify or document the external world He contends that these quantifiable perspectives while rooted in historical trends towards technology and data have become so pervasive that they represent a dominant ideological bias in the twenty first century In response to this data driven consciousness the book presents a series of exercises designed to cultivate an embodied experience with digital living not in opposition to the flood of images but within it Ultimately Photographing Ambiguity encourages readers to understand photographs not as benchmarks of reality but as ambiguous constructions of our present and future imaginaries

Ecological Poetics; or, Wallace Stevens's Birds Cary Wolfe, 2020-04-07 The poems of Wallace Stevens teem with birds grackles warblers doves swans nightingales owls peacocks and one famous blackbird who summons thirteen ways of looking What do Stevens s evocations of birds and his poems more generally tell us about the relationship between human and nonhuman In this book the noted theorist of posthumanism Cary Wolfe argues for a philosophical and theoretical reinvention of ecological poetics using Stevens as a test case Stevens Wolfe argues is an ecological poet in the sense that his places worlds and environments are co created by the life forms that inhabit them Wolfe argues for a nonrepresentational conception of ecopoetics showing how Stevens s poems reward study alongside theories of system environment and observation derived from a multitude of sources from Ralph Waldo Emerson and Niklas Luhmann to Jacques Derrida and Stuart Kauffman Ecological Poetics is an ambitious interdisciplinary undertaking involving literary criticism contemporary philosophy and theoretical biology
