the CD files can be found in the ebook [Concise Guide to the Internet of Things](#) Michael McCarthy, Barry Burd, Ian Pollock, 2025-01-20 Traditional products are becoming smart products and smart products are becoming connected. From smart homes to smart cities to smart farms this trend in product design and development is likely to accelerate and will have a profound impact on the future. This accessible textbook reference focuses on using the Internet of Things (IoT) to foster sustainability. It guides readers in a step by step manner through the creation of example applications designed to promote a clean and healthy environment. Additionally the book serves as a lesson in systems design taking the view that the IoT is best understood as an extension of the World Wide Web. Therefore the exposition examines how the Web was designed and how its principles can be applied to IoT design. The book engages readers with modern IoT technologies, standards and platforms. It connects sensors and actuators to the cloud but in a way that is based on sound architectural principles. Topics and features: Combines principles of computer science with hands on exercises and programming. Includes the Particle Photon 2 microcontroller and uses Node.js and Node RED. Covers cryptocurrencies, machine learning and identification technologies. Examines sensing and actuation using The Photon 2 and MQTT. Leverages large language models in exercises. The IoT has countless applications making this textbook reference appealing to a wide variety of readers. In particular those pursuing or interested in computer science, internet technologies, product design, city planning, sensor networks or software design will find the book intriguing and useful. Dr Barry Burd is a Professor at Drew University. Mr Michael McCarthy is an Associate Teaching Professor at Carnegie Mellon University and Mr Ian Pollock is an Associate Professor at California State University East Bay.
